

Red Eagle Gold Mining Co.,

Limited Liability.

Capitalization 1,200,000 Shares. Treasury 500,000 Shares.
Par Value \$1.00. Fully Paid and Non-Assessable.

OFFICERS: W. H. Fife, President; Wm. Bennison, Vice President; Jno. W. Cover, Manager; T. G. Elgie, Secretary-Treasurer.

The Red Eagle Gold Mining Co.'s Properties

CONSIST OF THE

Red Eagle and Red Pole Mineral Claims,

Composed of about 75 acres.

The Red Eagle.

The Red Eagle mineral claim is situated on the east slope of Deer Park mountain, between the Mayflower and Curlew claims. There are three known ledges crossing this property. These veins are known as the South vein, the Curlew vein and the Mayflower vein. The South vein, which has produced some of the richest surface ore ever discovered in the district, is six to eight feet wide with a 24 inch pay streak, assays from which gave returns of \$18 to \$285. This vein was but recently discovered by workmen grading for a tramway across the claim for the sawmill company, and is generally regarded as the most important of recent discoveries in the south belt. This vein is traceable across the entire width of the claim a distance of over 1400 feet. On the Curlew ledge an open cut has been made exposing a vein of ore four feet wide, from which assays of from \$14 to \$161 per ton have been secured. This vein has been exposed by a number of shallow pits and crosscuts for several hundred feet. The Mayflower ledge, from which this well known mine is now shipping such high grade ore, crosses the Red Eagle claim for a distance of 300 feet.

The Red Pole.

The Red Pole is situated one-half mile south of the Red Eagle and east of the Silver Bell mine. The Silver Bell ledge crosses the Red Pole mineral claim. Assays from this vein have shown over \$100 per ton of gold and silver.

Treasury Shares.

The company have secured the survey and are applying for the Crown grant, and will continue developing the property all winter, and fully expect to be able to find pay ore to cover the development almost from the surface. But to prepare for all mining emergencies and to fully equip the property with machinery we have placed 500,000 shares in the treasury, a limited amount of which we offer to the public at the rate of 7½ cents, and when the paid limit is reached the company will close their books and reopen in the course of ten days at an advanced rate for further stock.

ADDRESS

Red Eagle Gold Mining Co., Ltd.

Or, Wm. Bennison & Co.,

ROSSLAND,

B. C.

International Gold- Copper Mining Co.,

Limited Liability.

Incorporated Under the Laws of British Columbia.

Capital Stock 1,000,000. Par Value \$1.00.

FULLY PAID AND NON-ASSESSABLE.

Treasury Stock 350,000 Shares.

TRUSTEES. A. C. Sinclair, R. C. McDonald and J. S. Patterson,
Rossland, B. C.

Head Office Mine
Rossland, B. C. The Snowdrop.

Description of Property.

The Snowdrop is 3½ miles from Rossland in the South Belt. It is distant from the Crown Point about three-quarters of a mile. Adjoining it on the east is the Summit. A shaft on this claim shows a large ore body assaying \$12 per ton in gold. This vein runs through the Snowdrop. A site has been selected for a tunnel and work on the Snowdrop will be continued all winter.

Shares.

The remainder of the First block of Stock has been advanced to

Three Cents per Share.

The second block will shortly go on at Five Cents per share.

For shares or further particulars call on or address

Mining Brokers, Sole Agents, . . Rossland, B. C.

Remittances may be made to the Manager of the Bank of British
North America, Rossland.

Press Notices

of the

Red Eagle Mine.

Extract from letter in Vancouver Daily World, Dec. 1, 1896.

"The Red Eagle claim to the southwest of the Mayflower and Hill-Top has just become famous; ore has been found in the ledge of this Red Eagle claim that runs a thousand dollars to the ton in gold. Little or no development work has been done upon this ledge, but in the crosscut every piece of rock taken out of the ledge assayed high. The assays from this ledge were the highest ever obtained out of a Trail Creek mine, and once and for all gets rid of the absurd notion that only ores taken from the ledges of Red Mountain were valuable. Indeed it is rapidly dawning on the mining operators of this camp that the mining claims on Deer Park mountain are almost certain to outstrip those located on Red Mountain."

The Mining Review of Rossland says:

"It is curious how a comparatively unknown prospect will sometimes suddenly leap into prominence through unsuspected discoveries of ore on the surface. One would think that ground over which hundreds of prospectors had travelled, which is within a mile of Rossland, and which has been held by owners whose interest it was to discover mineral on the surface, would show few indications of ore which had been overlooked.

"And yet, during the last two weeks, a significance has been acquired by the Red Eagle location which none would have dreamt of attributing to it a month ago.

"What brought the property into prominence first was the discovery of a vein of ore in cutting the right of way for the tramway which brings logs to the new sawmill. This vein now known as the south vein, is between seven and eight feet wide and shows twenty-six inches of ore, the first assay from which gave a return of \$285-\$240 in gold and the balance in silver."

The Rossland Record of Dec. 10, 1896, speaking of this property says:

"William Thompson of London, Eng., associate member of the Institute of Civil Engineers, consulting mining engineer, formerly government mineralogist at Queensland, Australia, and lately president of the Coolgardie Chamber of Mines, was shown while in Rossland for some time, over this property and purchased some 30,000 shares of the treasury stock."

Kootenay-London Mining Co., Ltd.

Incorporated Under the Laws of British Columbia.

CAPITAL STOCK 1,000,000 SHARES

Par Value \$1.00 Fully Paid and Non-Assessable.

Treasury 350,000 Shares.

OFFICERS AND DIRECTORS. Wm. Bennison, President; W. A. Campbell, Vice-President; M. O. Tibbitts, Sec.-Treas.; J. W. Cover, Managing Director; O. O. Lalonde, A. J. McMillan, J. W. Boyd, Hiram Kitley, and J. S. Patterson.

Edward Pritchard, F. G. S., Consulting Engineer.

Head Office, Rossland, B. C.

Description of the Property.

The company owns the Annie Fraction and the Comet No. 2 mineral claims. The Annie Fraction is situated between the California, San Francisco and Black Bear, the latter of which is the property of the great Le Roi Mining & Smelting company and is the first western extension of the Le Roi mine. The vein of the Le Roi can be traced through the Annie Fraction and men at work on this property have tapped an ore chute at a depth of 40 feet from which assays gave returns of from \$14 to \$20.

The Comet No. 2 is a full claim, 1500 feet square, and lies about three miles north of Rossland. It has two strong well-defined ledges running through it. A prospecting shaft now down 10 feet shows nothing but vein matter the whole mass being well diffused with copper and iron pyrites. Assays averaging \$6 to \$8 have been obtained from this showing.

Shares.

The entire capital stock of the company excepting treasury shares has been pooled. The company now offers 50,000 shares of treasury stock at the low price of

Twelve and One-Half Cents a Share.

The proceeds will be used in purchasing machinery for the Annie Fraction.

For shares, prospectus or other information apply to

M. O. TIBBITTS, Secretary-Treasurer.

Or **J. W. COVER, Managing Director.**

Northport, Wash., Dec. 29.—(Speci
The mine on the south side of the
terrestrial boundary line are steady
pushing forward and attracting m
attention every day. That the
mineral belt, which has built up
land and made Trail Creek a fam
name throughout the world, exte
southward into the United States, th
can be a little doubt.

A comparatively short distance fr
the Deer Park and Silver Bell brings
to the boundary line, beside which
adjoining the Columbia & Red M
tain railway, are the Great Republic
Double Standard mines, both of wh
have ore for shipment. This ore wh
is of very good grade, resembles that
some of the best mines in the S
Belt.

To the east of these is the Helen gr
which has a vast body of practically
milling ore of fair grade, and across
line from it are a great many cla
located after the opening of the reser
tion last spring, but as yet very li
developed. Among these recent l
tions is a group of seven claims, ow
by the Royal Gold Mining company
which are several broad ledges of
milling rock, assaying from \$2 to \$4
ton on the surface.

Assessment work on other prop
on Grouse Mountain has disclosed s
very fine looking ore, which tho
probably more refractory than the
face rock, will give much higher val
Several companies have announced
intention to vigorously pros
development work in the spring.

To the west and southwest of the G
Republic and Double Standard, s
