### **HUNTING THE ELEPHANT** IN WILDS OF UPPER INDIA

A Graphic Description of an Exciting Hunt-The Methods Used in the Capture—Pointers on How to Behave During a Thrilling Chase

Elephant hunting is rapidly becoming an obsolete sport. The mighty pachyderm has become almost extinct in Africa, and wild elephants in India are yearly growing more rape. In India the huge beasts are trained to survive their African coustins, which have been recklessly slaughtered for their ivory. Probably before many become useful laboracy, and consequently the Aslatic elephants are bound to disappear with the mammoth and the dodo.

As practiced in Northern India, the kneddah, or elephant hunt, is exciting sport. It has quite as large an element of danger in it as is usually associated with a tiger hum. It is an unusual privilege to be permitted engage in a keddah. Elephants are scarce and they also are valuable. Although they may be wild, they belong to some Maharajah or other metive prince. Indian mabobs have their herds of elephants just as the commercial princes in other parts of the world used to have their "string" of thoroughbreds, and now have their collection of motor cars.

METHODS OF CAPTURE,

It is usual to pitch a camp some distance from town, and make this a headquarters from which the bunts start for the jungle each day. The start is usually quite pleasant. Guests are comfortably seated in howdahs on the bucks of the great elegiblants which are trained to hum? howdans on the breas of the gleat elephants which are trained to hund down their kind. Later on the how-dahs are removed, and the hunters have to eling to thick pads fied on the backs of the beasts. The pads, as may be imagined, are very uncom-fortable, and it requires some dex-terity and skill to prevent being un-seated, while only practice teaches the rider to accomplish a king jourv without undue fatigue

HOW TO SIT ON THE ELEPHANT. To the novice it is very difficult to swing the body in harmony with the peculiar pace of the mount, the conpeculiar pace of the mount, the consequence being much unnecessary strain on the muscles. The correct pesition is with the feet dangling behind the mahout, as the driver is called, and a pad rope in either hand. The poor mahout, in passing through the thick jungle, often resembles a stringed toy such as babies love, his legs violently agitated against his animal's meck, his arms waving above his head as he does his best to clear obstructions from the path of the "sahiblogue" above him. His own back is meanwhile dug by the points of feminine shoes, and his turban almost dragged from his head by the frenzied clutch of frightened feminine fingers. inine fingers.

WAITING FOR THE QUARRY. Arrived at the rendezvous ab olute Arrived at the rendezvous ab olute silence is strictly enforced. Shrill cries and distant shots indicate the direction from which the quarry may be expected. The men carry rifles ,too, not to shoot with—ordinary bullets would not make much impression on a pachyderm's hide-batto scare away the harried quadruped should he think fit to charge. A sudden momentary glimpse of a huge form lumbering past and the kheddah beasts, like hounds unlashed, are off, the moogriwallahs whacking away to urge their beasts to greater speed. The moogri, it should be explained, is a small wooden club, er speed. The moogri, it should be explained, is a small wooden club, into whose rounded end are hammered long nails with protruding heads. | BXCITEMENT OF THE CHASE.

Forcing a track through tangled indergrowth, knocking over young saplings and extricating ourselves from the embarrassing attentions of stronger trees, we tear along. Alt times the chase lies over a fairly level plain with the panting quarry full in view. More often we are lost in the pathless jungle, even the nearest elephant a few yards away away swallowed up by the reedy waves. A startled stag bounds straight across.

The nomad we are in quest of must be very close. But where? It is a thrilling moment. Soon a keen-eyed hunter spies him crouching within a thorny thicket. Nagendra Guj, hero of a hundred first is every to rout him out and

Nagendra Guj, hero of a hundred fights, is sent to rout him out, and help arrives. Again and again the beast breaks away, to be made prisoner at last in spite of gallant struggle or fleet and strategic retreat. Trained animals press closely up against the wild one. Stout ropes, securely noosed, are passed under his body. One end is attached to a tame elephant, the other is placed near the Nagendra's defenceless trunk before a fierce combit ensues. It results entirely in favor of the fugitives, whose sharp tusks have drawn blood from

The consequences were I bought a set of the Cuticura Remedies of one of my friends who was a druggist, and the praise that I gave after the second application is beyond description; it seemed a miracle, for the Cuticura Remedies took effect immediately. I washed the foot with the Cuticura Soap before applying the Ointment and I took the Resolvent at the same time. After two weeks' treatment my foot was healed completely. People who had seen my foot during my illness and who have seen it since the cure, can hardly believe their own eyes."
