THE BUSY TEN DOLLAR BILL
 Mr. Brown keeps a boarding house. Around his table sat his wife, Mrs. Brown; the village milliner, Mrs. Andrews; Mr. Black, the banker; Mr. Jordan, a carpenter and Mr. Hadley, a flour, feed and lumber merchant.
 Mr. Brown took ten dollars out of his pocket and handed it to Mrs. Brown with the remark that there was ten dollars toward the twenty dollars he had promised her.
 Mrs. Brown handed the bill to Mrs. Andrews, the milliner, saying, "That pays for my new bonnet."
 Mrs. Andrews in turn passed it to Mr. Jordan, remarking that would pay for the carpenter work he had done for her.
 Mr. Jordan handed it to Mr. Hadley, requesting his receipted bill for lumber.
 Mr. Hadley gave the bill back to Mr. Brown, saying, "That pays ten dollars on my board bill."
 Mr. Brown again passed it to Mrs. Brown remarking that he had now paid her the twenty dollars he promised her. She in turn paid Mr. Black to settle her bread and pastry account. Mr. Black handed it to Mr. Hadley, asking credit for account on his flour bill.
 Mr. Hadley again returned it to Mr. Brown with the remark that it now settled the balance for that month's board.
 Mr. Brown put the bill back in his pocket, observing that he had not supposed a greenback would go so far.
 But, suppose Mrs. Brown had sent to the mail order house for her new bonnet, then the \$10 would have gone out of town and never come back.
 The dollar that goes out of town never comes back, and the money spent at home is used to develop the community and help make improvements. If home trading were discontinued entirely there would be no towns in the country, and even the occasional dollar taken outside hampers the growth of the community.

WHOLESALE QUANTITIES NEEDED
 A serum has been discovered which will restore the dead to life. Only a small quantity is required. We know some perambulating our streets who should buy it by the barrel.
 The garage, exclusively used for women in Brookline, Mass., has closed because of its few patrons. The interior has an extensively furnished waiting room, lockers and other conveniences, especially for women drivers and car owners.

THE SULPHATED BATTERY

When a battery becomes sulphated because of neglect to charge it properly or because of low water in the cells it should be charged at a slow rate and discharged, the cycle being repeated until the battery is in good condition. Slow charging can be effected by operating the car with the sidelights or the headlights, during the day as well as at night. The set to use should be determined by the ammeter reading. When the ammeter hands begin to swing considerably past zero, the headlights should turn out. This will bring down the charging rate. If the machine is operated at a very high speed, it may be necessary to turn on the headlights to reduce the charging.

HUSKY PUPS BORN AT CHATEAU FRONTENAC

1 and 2—"Over the Top." 3—"Makwahie." 4—"Nagik" was born in April and is considered the most promising of the litter. It will be seen that wolf blood runs strong in his veins.

The Hudson Bay dog team which has been such a popular feature in connection with the winter sports activities inaugurated by the Chateau Frontenac at Quebec three years ago, shows promise of future teams of exceptional merit. Two very fine litters have been produced. On the morning of April 15th, the Indian who is taking care of them was delighted to find that Wobska, a beautiful white female husky, had presented as her contribution to Quebec winter sports, three pups which very much resemble wolf and whelps. One very fine pup developed rapidly and was named Negik. Wobska was jealous of the attention showed the family of her team mate and, not to be outdone, presented the Indian with a litter of eight. Great hopes are entertained for the future of this litter as wolf blood runs strongly in the veins of Makwahie, the sire, a splendid beast of some 100 lbs. with shaggy grey coat, long vulpine muzzle, pointed ears and pale amber eyes glinting through narrow slits. Makwahie was born in the wilderness north of Lake Superior.

The Indian is already making plans for the training of this last litter and expects to have them partly broken in before the first snow. This is usually done by taking a trained leader and placing her in harness with the pups. At first, traces are attached to a light birch log and the initial try out usually results in a wild scramble, the pups going in various directions with the leader turning around with a puzzled look as much as to say "what's it all about." The tangle is straightened out to the accompaniment of a chorus of yelps but gradually the young ones come to understand what is expected of them, and as the team becomes more proficient the weight of the log is increased. By the time a sleigh can be used they are able to draw heavy loads. In the North Country they can draw with ease on a broken trail a hundred pounds per dog.

Bake with the Good Kootenay

Then you will know how superior a range may be—and why it relieves cooking and baking of ordinary care and distractions.

For a generation the Kootenay has been a good baking range—and now its endurance is extended beyond all former records of long service.

"ENAMEL-CLAD" FLUES

The flue construction of the Kootenay is protected at every vital point with tough porcelain enamel, and the oven is built of rust-resisting Armo-iron. This unique McClary's construction extends the life of the Kootenay by many years.

Ask McClary's dealer to show you the inside construction of the Kootenay.
