Colonial Manufacture--- A Chemical Compound, Called
Ross' Patent Artificial Slate, and Unchangeable Metallic Paints.

T will be seen by the following Communication to John Ross, Eaq., of Halifax, the Patentee that those very celebrated Fire Proof Paints, have been admitted duty free into Canada, and we hope to see an article so much desired in a wooden Town like our own, relieved from Impost.

I . G. O. CUSTOMS DEPARTMENT,

SIR;—Your Communcation to His Honor the Administrator of the Government of Nova Scotia, on the subject of the introduction into Canada duty free, of Metallic Paints, and Artificial Slate by you, having been transmitted to the Governor General of this Province, by the Hon. Joseph Howe, Provincial Secretary of Nova Scotia, on the 26th ultime, I have the honor by command to inform you that the Inspector General, having submitted your application to the favorable consideration of His Excellency in Council, it has appeared to his Excellency, that the important purposes to which it seems the articles in question may be applied, render it desirable that those articles should be admitted into this Province duty free.

A notice will appear in the next issue of the Official Gazette, declaring Metallic Paints and Artificial Slate, being the products or manufacture of Nova Scotia, admissible into this Province free of duty.

I have the honor to be,

Yours, &c., R. S. M. BOUCHETTE.

Charlottetown, June 1, 1852.

PATIENT ARTHPHOTAL SLATE, And Unchangeable Metallic Paints: PROOF AGAINST FIRE & WATRIE

And Unchangeable Metallic Paints:

PROOF AGAINST FIRE & WATRIE

Manufactured by the Patentee, in Colchester, Nova Scotia
THE ARTIFICIAL SLATE is the product of a mixture of mineral substances known to be the best non-conductors of heat as well as the most indestructible; the Chemical affinity of which conducts well as the most indestructible; the Chemical affinity of which conducts well as the most indestructible; the Chemical affinity of which conducts which we will as the most indestructible; the Chemical affinity of which conducts which we will also be recomplish results as surprising as they are useful, by rendering Wooden fabrics as durable as brick or Stone, and less pervious to moisture, and consequently preventing decay and destruction from corroding influences hitherto supposed unattainable.

The principal ingredients are Alumina, Silica and the Oxides of Iron. The adhesive quality of the latter not only binds and attracts the particles together, but the substance covered also. The longer exposed to the weather the more powerful the attraction, and consequently the harder the State. As various shades of colour are obtained, Brick buildings may be made impervious to moisture, and the fashionable colours of either Free Stone or Granite. The oil must be evaporated by the action of the weather before it is Fire proof, which will take from nine to twelve months.

The METALLIC PAINTS, Purple and Red, are offered as Weather and Water Proof solely. Their base being Iron, secures them from Galvanic action so fatal to lead and other Paints on Iron work—and their chemical combination makes it impossible, that any change should take place from atmospheric influence or the action of Salt Water and Sulphureted hydrogen so prevalent in Sea Ports and Tidal Harbours. They surpass all Paints yet discovered in Cheapness and Durability, which render them pre-eminently datapted to the covering of all kinds of Iron work, such as Skipping, Mila, Bridges, Steam Machinery, Railway Care, and Iron Railing. The METALLIC PAINTS

FREDERICTON, N. B., Nov. 13, 1850.

Mr. J. W. Irish.

Dear Sir,—Please send us two more barrels of your Artificial Slate. We have seen some of the good effects of it at the last fire. Some of the Roofs covered with it did not catch at all, and when the walls were burnt some of the roofs came down in one piece, and others were the means of saving the building, especially one roof alongside of the Bank B. N. A., which also was one means of saving the Bank.

Please see that it is on board of the first boat, as it might be neglected and stored. FREDERICTON, N. B., Nov. 13, 1850.

Your obedient Servants, STEWART & NEILL. glected and stored.

St. John, N. B., July 20, 1850.

John Ross, Esq., Patentee of the Purple Metallic Iron
Paint.

Paint.

Sir.—I have just painted a new Ship with your Metallic Iron Paint, and I have much pleasure in stating that I never painted a Ship with so small a quantity of Paint and Oil, and look so well. From its adhesive qualities and the manner it covers the wood, I have no doubt but it will be more durable and much cheaper than any other paint used for such purposes, and would rec to the public generally.

Yours, &c. ROBERT G. MORAN.

Ross' METALLIC PAINTS.—We have already called public attention to the high estimation in which the Metallic Paints, manufactured by John Ross, Esq., Truro, are held by those who have had occasion to use them. Certificates of a highly satisfactory character in praise of these articles of Provincial manufacture appear elsewhere, in this issue, and from information afforded by parties who have similarly applied them, we can safely endorse the opinions therein contained.—Halifax Sun.

The METALLIC PAINTS are mixed and put on like in ordinary paint.

JOHN ROSS, Patentee.

JOHN ROSS, Patentee Agents for Prince Edward Island, GEO. T. HASEARD, Queer Square, KENNETH M'KENZIE, Pownal Street.

Charlottetown, Oct. S, 1881.
