

25 Cents to Stop That Itch

Does it not seem strange that so many people suffer year in and year out with eczema? A 25 cent bottle of a simple wash stops the itch and will surely convince any patient. This wash is composed of mild and soothing oil of wintergreen mixed with thymol and glycerine, etc., and known as D.D.D. Prescription. We do not

know how long the D.D.D. Laboratories will continue the 25 cent offer, as the remedy is regularly sold only in \$1.00 bottles and has never before been put on the market in Canada on any special offer. If you want relief to-night try a bottle at 25 cents on our personal recommendation. Taylor & Son, Druggists, Watford.

The Young Men's Christian Association Extending Its Activities

It is interesting to note that the Young Men's Christian Association is advancing another step in their great work of assisting young men. They are constantly reaching out far beyond their immediate membership, and are now doing a work which encircles the world in its effort to give the helping hand to any young men needing assistance. A new department of the work recently organized in the Toronto Central Branch of the Young Men's Christian Association is one which should be known to everyone. It is a co-operative effort between the Christian churches and the Young Men's Christian Association in which they unitedly undertake to look after all young men coming to Toronto as strangers, putting them in touch with employment, good rooming and boarding houses, proper companions and with prominent young men of the church, etc.

"Key-men" are being appointed in every church in Toronto, men who assume the responsibility of looking up young men whose names may be sent to them by the Secretary of the work. "Key-men" are also being appointed in outlying municipalities whose duty it is to notify the Secretary of the Inter-Community work of any young man leaving his home town and for whom he is to work, etc. Information is also being sent in from many other sources in Canada, United States and the British Isles as to young men coming to Toronto, and hundreds are already being looked after.

Parents and friends of young men going to Toronto will be glad to know of this important move on the part of the Y. M. C. A. and the churches, and will, no doubt, take the opportunity of notifying the Secretary of the Inter-Community work. Mr. E. F. Trimble, at the Central Y. M. C. A., Toronto, of any friends going to Toronto to live.

We understand that, without any properly organized effort, the Central Branch of the Toronto Young Men's Christian Association has assisted in different ways more than 5,000 men during the year ending May 1st last, fully 1,000 of these being assisted in securing employment. That being the case, the possibilities for good in this new department, with the churches assisting in every way, are beyond calculation.

We are pleased to give this information to the public through the columns of our paper, knowing that by doing so we are assisting in one of the greatest movements the Young Men's Christian Association has ever undertaken.

CAUSE OF ASTHMA.—No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

A school of dairying on an extensive scale is planned by the Argentine government.

The United States makes enough paper money each year to reach twice around the world.

LATEST IN CINEMATOGRAPHY

Pictures Shown in Natural Colors Without Screen.

At the Scala theatre, London, Eng., will be shown the very latest thing in cinematography—a method known as kinoplastikon by which moving pictures in their natural colors are now shown without a screen. A trial run was made at the Scala theatre recently. There was no dark shadows on the faces of the actors, and no blurs or indistinctness. The figures moved and sang with a wonderful realistic effect, the figures being projected into space without screen or darkened stage.

The possibilities of the new method are almost endless. It has been proved possible to get records of living celebrities, and yesterday the audience were not quite sure whether or not they were looking at real actors. Every figure makes his or her entrance, performs his or her share, and goes out just as in an ordinary theatre. There is hardly any feeling that one is looking at a moving picture, and the stage is illuminated all the time. The idea underlying the invention has some relation to geometrical patterns and the adaptability of reflections. The name explains itself—motion photography in prismatic relief. To the onlooker the stage of the Scala theatre is almost an uncanny place. Kinoplastikon can only be seen at the Scala, the proprietors having secured the rights of this new invention, which promises to revolutionize cinematography.

Crop Reports

Ottawa, May 14.—A bulletin issued today by the Census and Statistics Office records the condition of crops and live stock on April 30th as reported by agricultural correspondents throughout Canada.

It is estimated that in Ontario about 18 per cent. and in Alberta about 43.5 per cent. of the areas sown to wheat last fall have been winter-killed. These percentages represent a deduction of 281,000 acres from the total area sown to fall wheat, viz.:—1,086,800 acres; so that the area remaining to be harvested is now 825,800 acres.

The condition of fall wheat on April 30 was in Ontario 83.4 per cent., and in Alberta 76 per cent. of a standard representing the promise of a full crop, the corresponding percentages on the same date last year being 71.2 for Ontario and 76.2 for Alberta. For all Canada the condition on April 30 of this year was 82 per cent. of the standard representing the promise of a full crop, or 101 per cent. of the average yield of the past four years. Last year at the same date the corresponding figures were only 72.6 per cent. of the full crop standard and 87 per cent. of the average of the three previous years.

Spring seeding has made good progress throughout the greater part of Canada and was much further advanced at the end of April than it was on the same date last year. In the Maritime provinces seeding does not begin until May, but the weather was favourable and the indications were for an early spring. In Quebec there was also the prospect of an early season and about 12 per cent. of the total seeding was completed by April 30. In Ontario conditions were more variable but 40 per cent. of the total seeding was reported as finished. In Manitoba and Saskatchewan over 50 per cent. and in Alberta about 75 per cent. of spring wheat had been sown during the favourable weather of April. In Saskatchewan there is an apparent tendency to sow less wheat and devote more attention to dairying and mixed farming. For Quebec, Ontario and the three Northwest provinces the proportion of seeding completed on April 30 was for wheat 43 per cent., for oats 20.5 per cent., for barley 13.7 per cent. and for all crops 34.7 per cent.

About 22 per cent. of the area in hay and clover meadows is reported to have been winter-killed; but the average condition of these crops at the end of April was 40 per cent. as compared with 74.6 per cent. last year.

The condition of live stock remains generally satisfactory being for all Canada over 90 per cent. of a standard representing a healthy and thrifty condition.

A MUSIC-LOVING RAT

Montreal's theatre going rat, which has been much in evidence around one of the big play houses during the season, had a merry time one night last week. His family with the stage and the chorus girls was not to the latter's liking. He put the music on the rough for the time, although the audience got a whole heap of fun out of the unannounced addition to the program.

The chorus was just at its height when a big grey rat—old and wise—shot into the stage from the wings. Judging from the commotion there he was being hotly pursued by some irate, blood-thirsty individual. Wildly he raced between the lines of the lightly attired dancing girls. There was something doing there in a moment. Steps were lost, music went cornerwise, some chorus girls laughed out, others wanted to scream. It was a complete mix-up for a few moments. If there is any docking for the error on the ladies' part, everybody on the stage will have to take the same medicine, for that gray rat put that number on the program out of business.

THESE PILLS CURE RHEUMATISM.—To the many who suffer from rheumatism a trial of Parmelee's Vegetable Pills is recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and they will speedily give evidence of their beneficial effects.

The assessor gives the population of Thamesville as 780. This is a decrease from last year.

Zamboanga will be the first municipality to own an electric light plant in the Philippines.

Concrete is the best building material

A BROAD statement—Yet literally true. The aim of man from the beginning has been to make his building materials as nearly like natural stone as possible. The great labor required to quarry stone led him to seek various manufactured substitutes. The only reason he ever used wood was that it was easiest to get and most convenient to use. Wood is no longer easy to get. Like most building material, its cost is increasing at an alarming rate.

The cost of concrete is decreasing. So, from the standpoint of either service or economy, Concrete is the best building material. Canada's farmers are using more concrete, in proportion to their numbers, than the farmers of any other country. Why? Because they are being supplied with

Canada Cement

a cement of the highest possible quality, which insures the success of their concrete work. The secret of concrete's popularity in Canada lies in the fact that while we have been advertising the use of concrete, we have also been producing, by scientific methods, a cement so uniformly high in quality that the concrete made with it gives the complete satisfaction our advertisements promised. Concrete would not have been in such universal use today, had an inferior grade of cement been supplied. Insist upon getting Canada Cement. It is your best assurance of thoroughly satisfactory results from your concrete work. There is a Canada Cement dealer in your neighborhood.

Without this label it is not "Canada" Cement.

Write for our Free 160-page book "What The Farmer Can Do With Concrete"—No farmer can afford to be without a copy.
