

## BURRAGE AND MAGURN'S PUBLICATIONS.

medical dictionary, a history of the world, a complete natural history, a complete work on botany, also on mechanics, and a Church history. In short, there is no subject in connection with literature, the arts and sciences, history, biography, and the general range of human knowledge, to which reference is not made. There are eighteen very valuable and elegant maps; also thousands of illustrations of every conceivable kind, and well executed. The compilers have aimed at compressing the materials which in ordinary encyclopedias would fill a score of volumes, into two, and this they effect by compactness of literary style, and the use of small but clear type arranged in quarto three column form. All who want a book to which they can turn in a moment for anything in the world they want to know about, will find ZELL'S ENCYCLOPEDIA just what they require. Its information is, moreover, brought down to the latest date."
