"After a careful test of Johnson's Belladonna Plasters in the Philadelphia Hospital for Skin Diseases, I find an increased action and more immediate effect.—JNO. V. SHOEMAKER, M.D.

"Johnson's Belladonna Plaster has met with approval. An improvement has been made in the addition of Boracic Acid to the plaster base with a view of opening the skin pores and enabling the drug to be absorbed."—*British Medical Journal.*

"I am greatly pleased with Johnson's Belladonna Plaster. I find it gives quicker and better effect than any other I have hitherto used."—DR. D. H. AGNEW, University of Penna.

The essential feature of Johnson's Belladonna Plaster is the use of an absorption promoting base that frees the pores from fatty matter, thus insuring reliable and increased action of the drug.
