

Irregularities of the menstrual flow are, as a rule, the first manifestation of structural or other impairments of the reproductive organs. Those agents which restore the monthly visitations to normal limits, will, if properly proportioned and timely administered, exercise a curative influence upon the entire reproductive system.

DYSMENORRHEA

whether neuralgic, membranous, congestive, inflammatory, ovarian or obstructive in character, yields readily to the pain-relieving and flow-augmenting action of

Ergoapiol (Smith)

if one to two capsules are administered three times daily before and during the menstrual period.

AMENORRHEA

when due to sudden exposure to cold, mental shock, change of climate, etc., may be promptly relieved by the administration of

Ergoapiol (Smith)

in doses of two capsules three or four times daily for a few days in advance of the visitation, then giving one capsule three times a day until menstruation has ceased.

MENORRHAGIA

whatever may be the exciting cause, excessive menstruation may be controlled, and the uterus invigorated and toned by the administration of

Ergoapiol (Smith)

in doses of one capsule once daily for a few days in advance of the visitation, then increasing the dose to one capsule four times daily throughout the period.

This product is supplied in metal boxes containing twenty capsules. It is obtainable of all prescriptionists. Samples and literature will be sent, post paid, to physicians upon request.
