

Fellows' Hypo-phos-phites.

Contains **The Essential Elements**—to the animal organization—Potash and Lime ;

The Ozydizing Agents—Iron and Manganese ;

The Tonics—Quinine and Strychnine ;

And the Vitalizing Constituent—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction*.

It differs in effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has sustained a high reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

Its action is prompt, stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The prescribed dose produces a feeling of buoyancy to the intellect, removing depression or melancholy, and hence is of great value in the treatment of **mental and nervous affections**.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

A PHYSICIAN'S TESTIMONY.

A letter from one of the most eminent physicians in England, E. J. DAY, M.D., F.C.S., &c., has written the following letter to MR. FELLOWS :

DORCHESTER, DORSET, ENGLAND, October 2, 1880.

DEAR SIR :

Feeling it my duty to the medical profession, as well as to the public, to make known the effects of Syr. Hypophos : Co. : Fellows, I send you the results of my short but satisfactory experience. After using it in several pulmonary cases with good effect, I prescribed your Syrup for a middle-aged female patient, suffering from "melancholia," who was, up to the time she commenced taking it, so bad that her friends and husband had made preliminary arrangements for her removal to an asylum : so great, however, was the improvement under the new treatment, which consisted solely in giving your Hypophosphites, that she shortly was able to attend properly to her household duties ; it is only right to mention, that the drugs prescribed before, failed. Although your Syrup of Hypophosphites contains the active bitter tonics, with iron, etc., my young patients and invalids take the preparation readily. As a nerve tonic, I consider it ranks very highly, and is a valuable addition to the list of pharmaceutical preparations. I can, with great confidence, recommend it in cases of general debility ; consequently, those gentlemen who dispense their own medicines should not be without it.

I am, sir, yours truly,

E. J. DAY, F.C.S., M.R.C.S., L.S.A., M.M.P.A., R. & W. Medical Officer of Health, Public Analyst.

To MR. JAMES FELLOWS, London.

Letter from D. J. WYRBANTS OLFERTS, F.R.C.P.E., I.P.C.S., L.M., British Government Surgeon for L. M. & D. District.

ARMAGH, IRELAND, LURGAN, October 22, 1880.

MY DEAR SIR :

Having prescribed your Syrup of Hypophosphites in my practice, and having every reason to be satisfied with its good effects, I do not hesitate to say, I consider it a very valuable and excellent addition to modern *materia medica*. It has been found in my hands particularly beneficial in cases of low nervous tone, and with those convalescing from debilitating ailments. Your hypophosphites was first introduced to my notice by my friend, Dr. Killgariff, Surgeon to the Mater Misericordiae Hospital, Dublin. To avoid substitution in prescribing, I always write, Syr. : Hypophos. : Fellows : Comp.

Very faithfully yours,

J. WYRBANTS OLFERTS.

To MR. FELLOWS, Snow Hill, London.

Prepared by JAMES I. FELLOWS' Chemist.

Circulars sent to Physicians on application.

NOTICE.—Gentlemen : I will be pleased to forward a sample bottle, with formula, on application, to those who mention *THE CANADA LANCET*.

Address JAMES I. FELLOWS, Drawer 1965, MONTREAL.
