

MODERN SANITATION

requires dust-proof floors in schools and public buildings.

It has been proved by exhaustive tests that wherever

STANDARD Floor Dressing

is used the amount of germ-laden dust in circulation is reduced over ninety per cent.

The health of the school children is improved and the upkeep of school buildings reduced.

Application need only be made three or four times a year---during the holiday seasons. For economy and efficiency use the Imperial Floor Oiler. Can be applied also with a sprayer.

One gallon of Standard Floor Dressing is sufficient for 500 or 700 square feet.

Ask our nearest office for full particulars and prices.
