

COBALT --- Foster Liquidation Brings a General Market Weakness --- COBALT

LIQUIDATION RENEWED IN THE COBALT STOCKS

Foster is Heavily Sold and Other
Stocks Follow the Trend
of This Issue.

World Office,
Monday Evening, May 13.
A new weakness presented itself in the market for Cobalt shares to-day, and the prices of the principal stocks fell well below those at the close of the week. The heaviest selling took place in Foster, which was sold at from 130 to 124 1/2. No reason was forthcoming for the avalanche of selling orders in this stock, and the only inference to traders was that the large holders were again raising some of the stock. The break in Foster brought pressure on Tremblay, Silver Queen and the market in general. A strange coincidence of the afternoon's business was the dealing in Cleveland Cobalt, which sold on the Standard Exchange at 10 1/2 at the same time it was selling on the Toronto Exchange at 80. There was no new information to guide speculators or investors, and the only criterion of values was the prices as made by the professionals on the exchanges. Under the circumstances the close was extremely nervous. Nippingstock relaxed considerably at New York to-day, and this was not taken as a favorable influence by those who are given to watching the mining market as a whole.
