BE SUSPICIOUS OF TENDER GUMS

Be suspicious of any tenderness or bleeding of the gums. This is usually the first stage of Pyorrhoea—an insidious disease of the gums that destroys the teeth and undermines bodily health.
 Generally the gums become spongy. They inflame, then shrink, thus exposing the unguarded tooth-bases to the ravages of decay. Tiny openings in the gums form gateways for disease germs to enter the system. Medical science has traced many ills to these infecting germs in the gums weakened by Pyorrhoea.
 They are now known to be a frequent cause of indigestion, anaemia, rheumatism and other serious conditions.
 So watch carefully for that first tenderness or bleeding of the gums. Try Forhan's immediately. It positively prevents Pyorrhoea (Riggs' Disease) if used in time and used consistently.
 And in preventing Pyorrhoea—it guards against other ills.
 Forhan's (For the Gums) cleans teeth scientifically as well. Brush your teeth with it. It keeps the teeth white and clean.
 If gum-shrinkage has already set in start using Forhan's and consult a dentist immediately for special treatment.
