11,000 QUARTS OF CITY MILK UNFIT FOR USE

Inspector Reports Contamination Last Month to Board of Health

PERMIT OF FARMER ORDERED CANCELLED

Quantity of Beef in City Market Rejected on Account of Condition.

The milk which came to the city from Kings county during February was characterized by J. F. Tilley, milk inspector, as the worst milk that he had ever seen shipped for city delivery. Mr. Tilley, in his monthly report to the Sub-District Board of Health, said that about 11,000 quarts of milk coming to the city had been rejected as unfit for pasteurization and that it was no wonder the producers complained that they could not make money when their returns were greatly lessened by the poor condition of the milk. Mr. Tilley's report was read at the meeting of the board yesterday afternoon when John Kelly, chairman, presided. Preparations were made for the call to the citizens to clean up in the spring time and for the busy period of issuing of milk licenses on May 1.

"Clean Up" Period. The board gave authority for having 100 posters printed to notify the public that all yards and premises generally must be tidied up and put in proper order and sanitary condition. An application was received for the opening of a house which the board had ordered closed but which had since been repaired. It was arranged to have the premises inspected and if conditions were satisfactory to have the closing order rescinded.

Report of Inspector. The report of Dr. T. Fred Johnston, dairy and food inspector, showed that he had carried out the inspection of the premises of 140 milk producers and 15 cream producers located in the following districts: Lakeside, Nauyasewick, Hampton, Bloomfield, Norton, Aphopqui, Sussex and Hammond River. Three of the premises were scored as dirty and one permit was cancelled. Dr. Johnston also reported on having seized beef in the city market, weighing 645 pounds, which he found to be unfit for human consumption. His inspection of slaughter houses revealed the fact that 70 animals had been slaughtered in the two houses, the smallest number of animals slaughtered locally in one month for many years. It was thought larger importations of western beef were responsible for the small number of local animals being butchered.

PAIR BEAT AND ROB MONTREAL WOMEN

Culprits Then Set Fire to Boarding House and Make Getaway.

MONTREAL, March 4.—After gagging Mrs. B. Allard, 32, landlady of a boarding house in Jeanne Mance street, and robbing her of \$148 and beating her housekeeper, Ruby Galloway, 28, into unconsciousness this afternoon, two young men, so far unidentified, set fire to the house in four different places in an apparent effort to remove traces of their crime.

By rolling from the house into the yard, Mrs. Allard managed to escape. Firemen, who had been summoned by a passerby, saved Miss Galloway from asphyxiation when they carried her unconscious from a room on the second floor.

Set Fire to House. The women's assailants had been roomers at the Allard house and attacked them separately this afternoon. One of them knocked Miss Galloway unconscious while the other attacked Mrs. Allard and took \$148 from her. Following that Mrs. Allard's assailant gagged her and taking coal oil from two lamps spread it over different parts of the house and setting fire to it escaped.

Police are combing Montreal and district for the two men but up to a late hour no arrests had been made. IN THE NEXT WAR. LONDON, March 5.—Everyone in the large cities will be forced to wear gas masks during the next war, says J. B. S. Haldane, noted British chemist.

In the Night

Johnson's Anodyne Liniment

is when sickness always threatens most. But with a bottle of Johnson's Anodyne Liniment, night dangers from coughs, colds, sore throat, cramps, chills, etc., are quickly stopped. ASK REVISION OF LIGHTHOUSE RATES

Deer Island Keeper Member of Delegation Waiting on Government.

OTTAWA, March 4.—A deputation of lighthouse keepers representative of 1,600 members of the Canadian Brotherhood of Lightkeepers' Association, scattered throughout the Dominion of Canada, today waited on the Dominion Government presenting two requests:

A—New schedule of wages for light keepers and assistants, which they wish the Government to adopt.

B—That keepers of lightships be furnished with motor launches.

A. R. Conley, Deer Island, N. B., was a member of the deputation.

Lower Than in U. S. In presenting their requests the delegation pointed out that the present wage schedule for Canadian light keepers was on the average 75 per cent. lower than the schedule for similar stations in the United States.

Regarding the request for gasoline launches the petition pointed out that they were to a large degree necessary to the rendering of first class efficiency and service.

Hon. F. J. A. Cardin, Minister of Marine and Fisheries, agreed to give their request his earnest consideration.

COURSE FOR GARAGE MEN.

An intensive course of instruction in automobile mechanics for garage foremen of New Brunswick is being conducted in the garage of J. Clark & Son here.

W. F. Herzog, of the Studebaker corporation, is in charge of the classes. In the work a car is dissembled by those taking the course and it will be assembled again. In this way the features of the automobiles are shown and the garage men become thoroughly familiar with the different parts of the car. Besides training in features of the car, the instructor has samples of automobile tools of latest design and instruction in their use is also given. The course will be continued until the end of the week, when the garage men will be better qualified than ever to take care of the automobiles of their customers.

O-Cedar Polish

For polishing all fine furniture, woodwork or floors use O-Cedar Polish. It cleans as it polishes. Just a few drops on a damp cloth give the surface a gleam obtainable no other way. Used in millions of homes the world over. Sold everywhere. 4 oz. and 12 oz. bottles 25c. and 50c. It costs less to buy larger quantities in case.

A Tradition of the Sea

SEA-FARING men have known the house-ship of Cunard for eighty-five years. Ever since the days of the old China clippers, they have seen it riding proudly on the high seas—standing for all that is highest and best in ocean passenger traffic—safety, comfort, pleasure and courteous, efficient attention to the traveler's welfare.

When you go to Europe, add to the advantage of Cunard Service the pleasure and educational interest of a trip down the majestic and historic St. Lawrence River by choosing the Cunard Canadian Route.

Ask your local steamship agent for particulars and sailing dates, or write to—

Come and See Why the Roast Doesn't Shrink!

THE advantages of electric cooking are growing with every new improvement to Moffats Electric Ranges. We want to show you what a "Moffat," taken from our regular stock, will do, so we're having a demonstration of real cooking in our store—and you and every other woman (and the men, too) are invited to the "show."

The cooking results obtained by the expert in charge of the demonstration can be duplicated in her own kitchen by any woman. We want to demonstrate that Moffats Electric Ranges cook with less shrinkage of food and do it more cheaply. Their beautiful designs and fine workmanship need only to be seen to be appreciated.

Be sure to examine the newest "Moffat"—No. E-36-F—designed specially for the modern small kitchen. Only 41 inches long, yet has oven space for the largest roast. Also ask to see the No. E-30-F—a "Moffat" Cabinet Range that is supreme value and a great favorite. Look them over for yourself—to-morrow—at

TWO CREAMS that give the line-free, lovely skin that Social Life demands

Oiliness banished
Clogged pores cleared
Rough patches smoothed
A dry skin softened
The skin prepared for powder
The complexion brightened

Every skin needs these Two Creams

MADE IN CANADA

Of the greatest importance to all women who want to keep their youth and beauty is the Society Woman's choice of a way to care for her skin.

With the leisure and money to test the best products and with the determination to use only those that give effectual results, she has turned to just Two Creams.

They afford so simple, so sure a way of keeping her complexion flower-like, fresh. Now she's telling all her friends about this wonderful method of skin care:

First, the Refreshing Cleansing. At least once a day, always after any exposure, she spreads Pond's Cold Cream thickly over her face and neck. She lets it stay on long enough for its pure oils to sink down into the pores and bring up the powder, dust, excess oil with which they have been clogged.

Then with a soft cloth she wipes off all the cream—noting how much dirt comes, too. Once again, she creams and wipes her face, finishing with a dash of cold water or a rub with a bit of ice.

If her skin is inclined to be dry she puts

Pond's Cold Cream on again before retiring, and lets a little stay on all night.

The glow of roses is in her cheeks and throat now. Her skin looks—and feels—clean, invigorated.

Next, the Delicate, Protective Finish. She smooths into her skin just the lightest fluff of Pond's Vanishing Cream and sees it instantly absorbed—for it is greaseless. She notes what a soft pearly glow it brings to her skin. How velvety-smooth the finish it gives.

The Last Touch—a soft Pearly Glow. And then she powders—and rouges—re-marking how well the rouge and powder blend and how smoothly they cling over this delicate foundation cream.

And when she goes out, Pond's Vanishing Cream is an invisible cloak that protects her from winter wind and cold and the sooty air of the city.

You, too, may have this rejuvenating cleansing, this soft finish and protection for your skin.

Read what the beautiful women of the most exclusive Society of two continents have said of Pond's Two Creams. Then buy your own in any drug or departmental store and begin to use them, proving that all these words of praise are true. The Pond's Extract Company.

THE PRINCESSE MARIE DE BOURBON

"The exquisite skins of beautiful women everywhere must be watchfully cared for, or, like fragile flowers, they wither, they fade."

"Happily, however, no woman's skin need fade if she faithfully uses Pond's Wonderful Two Creams."

MRS. GLORIA GOULD BISHOP

"The women of the younger set today never permit the strain of many engagements to mar the smooth delicacy of their complexions. Fatigue can leave no trace on the skin that is cared for by Pond's Two Creams. They are really remarkable."

THE DUCHESSE DE RICHELIEU

"The woman whose life is given to society must always appear with a complexion fresh and radiant. Care of her skin can best be obtained by the daily use of Pond's Two Creams. They keep the skin exquisitely soft and lovely."

THE PRINCESSE MATCHABELLI

"American women do not allow the effects of exposure to mar their complexions. Indeed their charming youthfulness is due largely to their clear, fresh, beautifully cared for skins. Women everywhere can acquire the same perfection with the use of Pond's Two Creams."
