Mr. Justice McCreight are in favor of dismissing the appeal by the city, while Mr. Justice Drake supports the appeal. Unfortunately, because had the decision been unanimous it might have been wise to accept the decision, and so end litigation. Fortunately, because a matter involving so much were better decided once and for all by the privy council. Almost at the outset of the litigation resulting from the Point Ellice bridge accident the chief justice advised arbitration; on general principles arbitration is the wisest course in such matters. But when the suggestion was offered it was felt by many that it was impossible for Victoria to adopt it. How could the city authorities go to arbitration upon a matter in which, their legal advisers assured them, they had no liability? How could the city council of that year assume the financial responsibility for a calamity in which the tramway company were the chief actors and the provincial government the originators? How could the city council consent to arbitration when questions plies as cheaply as any outfitters on the of fact were in dispute, questions of law unsettled and the sympathy of the public generally (which counts for some- | will be thoroughly trustworthy. That a man holding a prominent official position should go out of his way to use that position for the gratification of his own vanity in connection with an important public function, is deplorable. THE LETTER.

Cox, is sufficient to settle the liability upon the city, is a matter open to doubt. That doubt was evidently felt by Mr. Justice Drake, who in his decision has declared on behalf of the city. Under the circumstances, therefore, there seems no course open for the city but to appeal to the privy council. If the decision of tleman who knows the country well the majority of the supreme court be upheld, it involves a liability so tremendous as to demand the introduction of a system of municipal insurance or the creation of a sinking fund to meet such contingencies. It is impossible for a corporate body with the ordinary staff. at the disposal of municipal institutions in a sparsely settled city or district to employ a sufficient number of engineers, inspectors or foremen to insure the maintenance of all bridges, roads. streets, sidewalks, drains, sewers, electric poles and wires, machinery and buildings, in such perfect repair that accidents are absolutely provided against. We fail to understand why the provincial government and the tramway company were not made co-defendants. The provincial government built the bridge that afterwards collapsed, and they granted the charter that allowed the tramway company to use the bridge. They placed no restriction of any kind upon the company relative to weight of cars, number of passengers, strength of bridges or the general safeguarding of the public. When the city enlarged its boundaries they simply assumed the position of the provincial government, and any moral liability lies at the door of those who gave away a valuable charter in so loose a manner. They were not made co-defendants presumably because, "The king can do no wrong." The attorney-general, however, would not have refused to let the matter be tried, for Mr. Eberts is not so obdurate as to compel the city to bear all the burden if it could be shown that the provincial government was also liable. The tramway company's position is a little peculiar. If we understand aright the present company is legally distinct from the company that owned the cars, the machinery and the franchise in May, 1896. How the arrangement was made, or why it was made, are matters not necessary to discuss. But that a company whose ponderous car, crowded to an unreasonable degree with passengers, should be allowed to carry to their death upwards of fifty persons, without the slightest attempt being made to prove, that company's liability, seems very strange. No citizen could withhold approval if it were decreed that a rea-

A CORRECTION. To the Editor :- I beg you will cause to be corrected a statement which appeared in last evening's Times making me say that I also was of opinion that Captain Walbran should have brought Mr. Keefe, of the schooner Annie C. Moore, from Juneau to Victoria in the Quadra. I offered no opinion on that subject (the reporter must have misunderstood me) when I explained to him Captain Walbran's reasons for refusing his request. Neither did I state that the Department of Marine and Fisheries was responsible for the expenses of bringing the crew of the Annie C. Moore to Victoria after the casualty. I did say that the agents of the schooner had submitted an account for these expenses to the . department through me. These expenses

McKinley's Request for Her Release Refused by Great Britain.

Chicago, Nov. 6 .- The campaign in the inerest of Mrs. Maybrick is being pushed in this city., Mrs. Helen Densmore, lately ar-rived from London, and who is now stop-ping at the Auditorium, to-day made the ollowing statement: "When President McKinley a few months

since sent a note to the English government through Ambassador Hay, requesting Mrs. Maybrick's release as a matter of international courtesy I had great hope. The question of Mrs. Maybrick's innocence or guilt was entirely ignored; her release was as a reciprocal favor. The English government returned the request that they no reason to re-open the case of Mrs. May President McKinley did not ask brick. that the case be re-opened; he simply re quested her release on the ground of inter-national courtesy. I hope that President McKiniez will follow this matter, up by ex-

aining to the British government that did not ask to have the case re-opened. he simply asked the favor of an international reciprocal favor, and that he w'll insist upon a specific answer to a specific request." procal favor, and that he w'
