General Business.

TO THE FARMERS OF MIRAMICHI

We have been Manufacturing **IRON FRAME MOWERS** For the last four years, and are now offering to the farming community this, the

BEST MOWER combining greater excellence of mechanical simplicity together with greater durability and entire reliability for all the requirements of the field, than any other Mower extant.—In construction they are similar to the celebrated Walter A. Wood's Iron Frame Mower, and the Richardson Buckeye, both American Machines. Of the former there are over 200,000 in use, and the extraordinary number of 20,000 were manufactured and sold last season, by the Wood Company of United States. We have over 500 of our manufacture now in use, every one of which (no exceptions) stands as a monument of the grand and unprecedented success of home manufacture and our enterprise. A list of our Agesta in this section of the Frovince will be found appended, and farmers are requested to sak information of them relative to our Mowers in use in their respective localities, which will establish beyond doubt their unquestionable superiority over any other mower to be had in our market.

The facility of procuring all parts or pieces within a nominal length of time must show beyond the shadow of a doubt the claims such an enterprise any other mover to the Maritime Provinces.

For the coming harvest of 1877 we will manufacture LaRCHELY in excess of our numbers of last season, and trust that our growning enterprise may find such inducements held out to it as will be commensurate with its merits.

Let it be remembered we have no hesitation at all times, in entering into a friendly competition in the Beld with any other machine in our market.

CHATHAM, THURSDAY, AUGUST 2 1877.

THE PREMIER COMING .: - Ottawa despatches state that the Premier left that city yesterday for the Maritime remain a short time among his Miramichi friends if the running of the trains will permit. We are quite sure that, as Premier of Canada, Mr. Mackenzie will be heartily welcomed

The Fishery Commissioner's Report. the schedules showing the salaries and ontingent expenses paid to officers, and the Report of the Inspector for this Province, in order that we may continue to deal with the part of the subject we had in hand in our last article. In proceeding with an examination of the Commissioner's Report one is impressed with the intelligence and experience that are brought to bear upon the important matters treated by many of the officers, who give the Department the benefit of their experimental knowedge and unbiased judgment. In passing, therefore, we may say it is with regret that we leave untouched, for the present, the singularly clear and able report of N. Laovie, Esq., Fishery Officer in charge of the steamer "Lady Head," the tone of whose remarks is in such creditable contrast with the oracular deliverances of Mr. Inspector Venning of this Province.

Those who know most about the sub-

ject of our fisheries are sensible of the fact that there is no matter connected with the important industries of the country which presents a wider or more difficult field of experimental study-no liable to be misled by theory. The Canadian hunter and trapper and the and to follow its denizens in all their or directly. ain only a part of the knowledge we and the person who enquires mostwho knows most-will realise how inadequate is his knowledge, and he will seek to be taught rather than to assume quack may be found airing his supposed knowledge even in the presence of those who know that he is a pretender and cheat, while he passes among the

From a general survey we come to the past experience. The worst feature about conclusion that the first thing a man does | boat-races is the demoralizing delay which on awaking from sleep in a Railroad Car so often results for want of the necessary is to yawn frightfully and glare around in the most savage manner, while the women begin to arrange their hair before fairly erect and their eyes, only half open, are fixed on the place where the glass ought to munity for a whole week. It is a question be. Might not these traits, trifling as they of aquatics if this smooth water difficulty appear, be taken as an index of character. I-I'm afraid to pursue this subject further. Across the passage at my elbow is a family party, consisting of a middle aged gentleman and lady and a so't looking young man, whom there was no mistaking as their son. This family carried more carpetbags, valises and portmanteaus than I ever remember to have seen in any other similar case. The seat before them the models might have considerable influvan; the young man who occupied a solitary seat could hardly turn around and a ble feature in modern boat-racing is the battery of the same portables was erected jockeying that seems to be inseparable between the elders. They prepare to refresh themselves. By a dexterous dive after great waste of time and demoralizunder the seat in front the lady produces ation, is satisfactory in its results, and a hidden receptacle from which a small what with fouling and other mishaps, either crock of preserves and various substantials intentional or otherwise, a fair, square are produced. Another lunge about the victory beyond the question of debate gentleman's feet produces a counterpart which is made to disgorge sundry bottles which is made to disgorge sundry bottles and tumblers and the next swoop brings races on the Kennebeccasis, the beaten forth a glazed bag which we find contains plates and cups. We look on in wonder in the second an accident. As boat-racing not unmixed with awe and would hardly feel surprised if a grab at the floor of the passage produced two or three additions to this heterogeneous pile of luggage. The the Telegraph, the day after the race. to this heterogeneous pile of luggage. The pile in front is invaded and ruthlessly overhauled by the lady, varied by an occasional plunge about young hopeful and her liege lord who, throughout, maintains a seronity which marks him as no common man. Everything being arranged business proceeds in a pathodical mess proceeds in a pathodic seek, for there are times when we are, practically, led out of our depth and practically, led out of our depth and making political capital for the gentleproper form in which to carry on aquatic If we become too bold in building upon who succeeded the latter, as head of the these we are in constant danger of being the danger of being
