## FIGHTING RECORD OF EUGENE BROSEAU, CANADIAN CHAMPION

Montreal Fighter Has Only One Known Decision Against Him—Twenty-One Knockouts—Nine Secured in Amateur Ranks and Twelve as a Professional—Held Amateur Titles.

That Eugene Broseau has earned the right to the title of Canadian middleweight champion is shown by a successful career as an amateur as well as a professional. Broseau jumped from the amateur ranks during the summer of 1919, after he had served in the Royal Air Force the previous season, while still an amateur champion.

Broseau started his boxing career when he entered in the Montreal City Championships, held at the M. A. A. Club House during April, 1915. He was defeated in the preliminary round by A. Rivet, one of Montreal's best welterweights. Not discouraged by his defeat Broseau entered in the Canadian Championships held at Toronto, in May, 1915, and was lucky enough to draw the semi final for his first bout. He won from Coret, and in the final defeated A. Holt, which gave him his first title.

The French-Canadian followed his victory by entering in the American championships, held at Boston, and fought under the colors of La Casquette Club, Montreal. He was forced to win from four men to annex the title, winning the first bout by a knockout and the other three on the decision of the judges. His greatest achievement as an amateur was in 1917, when he defended his National title in the International tournament at San Francisco. In that event he fought in the preliminary, semi and final bouts, winning all three by knockouts. He earned the title of champion of the Royal Air Force when he defeated W. McKenzie in a six-round bout at Long Branch, Ontario, in June, 1918, shortly after he had enlisted.

Broseau's first professional fight was against Gordon McKay. He scored an easy decision, knocking him out in the third round. From then until his victory over Young Fisher on Monday night last, he has not had a decision against him. Broseau is fast reaching the top rung in the ladder of success, and is matched to fight Mike O'Dowd, world's middleweight champion, in a local ring on May 24. To earn the title Broseau must knock O'Dowd out, as no decision can be given by a referee in a Montreal fight.

Broseau has several bouts scheduled for the next month, and will take a rest up before going in the ring against O'Dowd. The following is Broseau's record as an amateur and a professional. He has nine knockouts to his credit as an amateur, and twelve as a professional:

### Amateur Record.

Montreal Championships, 1915.

April 19—A. Rivet . . . . .L.

Canadian Championships, 1915.

May 10—M. Coret . . . . .W.

May 11—A. Holt . . . . .W.

American Championships, 1916.

April 9—J. Cahon, Boston . . . . .K.O.

April—M. Burke, Boston . . . . .W.

April 4—R. Hillon . . . . .W.

April 4—M. Stark, Boston . . . . .K.O.

Canadian Championships, 1916.

April 22—W. Russell, Toronto . . . . .K.O.

April 23—J. Taylor, Toronto . . . . .K.O.

## British Golf Balls May Flood America

New York, March 19.—A. Linde Fowler writes: British-made golf balls may flood the American market this year and cause a reduction in prices all around.

That is at least a possible development growing out of two causes, one of which is, surprisingly, the maintenance of pre-war prices on the leading British makes, and the other the rate of exchange between this country and England.

It takes only \$1.50 today, in American money, to purchase \$4.88 worth of British goods, for such has been the depreciation in the pound sterling.

Apply those figures to golf balls and some startling results are discovered. Suddenly, it is found that one of the best-known makes of British golf balls can be purchased at retail, brought over here, have freight and duty paid on it and stand the purchaser approximately 65 cents less than the same ball retailed for in this country last year and 50 cents less than his present retail list price.

Cut in Prices. The ball specifically in reference is advertised in the January, 1919, number of "Golfing," a British publication at two shillings sixpence, which is the equivalent of about 60 cents on normal exchange rate. The rate of money exchanged between the United Kingdom and England being approximately 23 per cent. in favor of this country, the golf ball which sells for 60 cents in English money is worth only 45 cents in American coin.

Taking forty-three cents as the purchasing basis, therefore, and this at retail, there must be added to the purchaser's cost before the balls are in his possession the customs levy and the freightage. His customs fee, according to a statement secured from the customs house, would be 25 per cent.

Granting that the duty is assessed on the full retail purchase price of sixty cents, the duty would be only fifteen cents. A man can have eleven pounds sent to him in one package by parcel post at the rate of twelve cents a pound, try weight. Between four and five balls can be sent in a one pound package, inclusive of wrappings and at the rate of only four balls to the package, would amount to only three cents per ball.

Adding to the purchase price of forty-three cents (American value), the fifteen cents customs duty and the three cents postage, the total cost would be sixty-one cents for one of the best makes of balls on the market and one quite familiar to American golfers.

New York, March 19.—Advice just received from English yachting circles indicate that there may be an appeal for the special privileges in connection with the contests for America's Cup this summer, and that the New York Yacht Club may be asked to permit another yacht than the Shamrock IV, to compete for the trophy.

It has generally been understood that the Shamrock IV, built especially for the purpose from designs by Nicholson and sent to this country in 1914, would be the craft to carry the private signal of Sir Thomas Lipton in the contests when they take place, but The Field suggests that Sir Thomas Lipton's 23-meter Shamrock, designed by Pile, which is to be used as the contending craft in the tuning up races of the Shamrock IV, in these waters, may prove to be the better yacht, or the one with the bet or chance to win in the big races for the coveted cup—an asks who, then the 23-meter craft will be permitted to contend if she proves to be the better boat.

In its comments on the two Shamrocks, The Field takes the stand that the Shamrock IV may be faster—and the publication does not doubt it—still the 23-meter craft is known to be very speedy, in addition to which the latter, with her altered keel, curiously enough comes very close to fitting in under the American rule, and would not have to allow much, if any, time to the American defender, whereas the Shamrock IV would be heavily penalized.

The 23-meter Shamrock is built to Lloyd's heavy scantlings and has a heavy deck house, as well as being full of heavy cabin fittings, all of which are described as "drawbacks," but while the scantlings could not be altered, the deck house and heavy cabin fittings could be removed.

Continuing, The Field says: "The Americans are leaving nothing to chance, neither should Sir Thomas Lipton. They will get the utmost out of both their boats. So should Sir Thomas Lipton get the last inch out of both is boats. If he insists upon doing so, then he will have a better chance of winning the cup than he ever had before. If he is so ill-advised as to only to tune up the Pile 23 meter in a half-hearted way, then he will not be making the most of his opportunity."

Commenting on the situation which the presence of two Shamrocks in this country may bring up, The Field says: "Early next summer the Americans will sail a series of voy and trial races between Resolute and Vanite, and the better boat will be selected to defend the cup. At the same time and in the same waters, America's Sir Thomas Lipton will sail a series of equally hard races between Shamrock IV and his 23 meter; but which ever boat proves the better, according to the Dead or Gilt Shamrock IV, must race for the cup against the better of the two American boats. Supposing, however, in his trial races Sir Thomas Lipton finds out that the 23 meter is the better boat, what would happen then?"

"No doubt, according to the Dead or Gilt, Sir Thomas would still be bound to race with the Shamrock IV. We shall not, however, assume that the Americans would be such poor sportsmen as to insist upon this, indeed we have every reason to believe that they would not want to sail against Sir Thomas's ship."

"If the 23 meter is asked to race in the trials with the weight of cabin fittings on her back, she will not have a sporting chance against the Shamrock IV. If, on the other hand, the fittings and every bit of superfluous weight are removed, and her designer compensates her accordingly, she will have a good run for her money. This is what we want her to have become we should like to see Sir Thomas Lipton sail the one."

On the G. W. V. A. alleys in the Wellington league last evening the Customs House took three points from the Nashua Pulp and Paper Co. Following is the individual score: Customs House.

Cochran . . . 81 79 75 235 78 1-3  
Willie . . . 78 109 89 267 89  
Bryant . . . 72 70 80 222 77 4-3

Cogrove . . . 100 119 96 315 105

462 477 424 1363  
THE UNIVERSITY CREWS.  
London, March 19. — (Canadian Press.)—Captain Allen Portyont, a well known Toronto oarsman, who has seen both the University crews at their preparatory work for the boat race tomorrow week, says that Cambridge with four of last year's winning crew, including stroke and number seven, show considerably better form than Oxford. The combined coaching of Steve Fairbairn and Arbuthnot should give them victory.

Hartley, the Cambridge stroke, has developed a chill.  
MISS MACKENZIE TO SAIL.  
Toronto, March 19.—Miss Ada MacKenzie, lady golf champion of Canada, has decided to sail for Ireland in April to take part in the world championship contests there in May. Miss MacKenzie was the first to bring the Canadian championship to Toronto, and she is determined that this country shall be represented across the water.

## Thinks Carpentier Has A Good Chance

Jack McAuliffe, Only World's Undeatable Lightweight Champion, Claims Frenchman is a Good Scrapper and a Finished Boxer.

New York, March 19.—Jack McAuliffe, the only world's undefeated lightweight champion, believes Carpentier has more than a chance of beating Jack Dempsey.

McAuliffe's opinion is a bit interesting, the more so because he takes sides with the minority boxing fans on this side of the water who believe Jacques Dempsey's crown will be in dire danger when he toes the mark with the Frenchman.

"I understand," said McAuliffe recently, "that there are quite a few good folks on this side of the Atlantic who figure George Carpentier is a setup for our great Dempsey. Now maybe they're right. No one will be able to say positively whether or not Carpentier is a Dempsey setup until after he has met the champion."

"But I want to say one thing in particular for Carpentier
