

SHORTHORNS

2 imported bulls of gilt-edged breeding and of the finest quality.
 4 bulls from imported sires and dams; thick, sappy, good feeders, from my best cows.
 4 bulls from imported sires and from straight Scotch cows of the best breeding.
 4 imported cows with calves at foot, or nearly due, on which I am making an interesting proposition.
 6 cows and heifers, bred here from straight Scotch parents, a grand lot.

No man has ever been in such form in Canada to offer such **Shorthorns** as the above at such moderate prices. Ask for catalogue and prices, they say a lot, but the cattle will speak for themselves if you come and see them.

Am taking orders now for **SHOW or BREEDING SHEEP** of the following breeds: Shropshires, Oxfords, Cotswolds, Southdowns, Dorsets or Hampshire, to be imported in time for the coming show season.

Telephone, telegraph, post office and railway address:
ROBERT MILLER, **Stouffville, Ontario.**

VALLEY FARM

WM. HENDRIE, Hamilton, Ont.

QUESTIONS AND ANSWERS.

Miscellaneous.

SWELLED KNEE.

Durham bull has had knee badly swollen
 for six weeks; is tied up. It does not
 seem very sore; it is quite soft, and feels
 as if there was fluid in it. C. T. B.

Ans.—As long as it is not sore, and it
 does not lame him, we would not advise
 treatment, as irritating applications
 might increase the trouble. If it be-
 comes hard and sore, causing lameness,
 we would advise bathing, first with warm
 water, followed with warm vinegar, and
 a bandage, and would pad the floor of
 his stall with sacking over-straw.

ARTICHOKES FOR STOCK.

1. Are Jerusalem artichokes a profit-
 able food to raise for horses and sheep?
 2. What kind of land is most suitable
 for raising them?

3. How are they planted, and how
 many per acre?

4. Where can seed be procured, and at
 what price?

5. What is the most profitable breed of
 sheep to raise for both wool and lambs?

6. What kind of land is best adapted
 to sheep-raising?

7. What kind of potatoes does best on
 light sandy soil, not very rich?

Ans.—1. Jerusalem artichokes are
 strongly recommended as a food for hogs.
 They are claimed to be enormously pro-
 ductive, and hogs turned into a patch of
 them in the fall, after they have matur-
 ed, do their own digging, and yet leave
 enough tubers in the ground to insure a
 crop the next season. They are recom-
 mended for sheep also, but the labor of
 digging would be a serious item.

2. Rich deep loam.

3. They are planted almost exactly as
 potatoes are. In rich ground, rows
 should be from three to four feet apart.

4. Seedsmen advertise tubers only, at
 \$2 per bushel. Write for catalogue.

Veterinary.

BONE SPAVIN.

1. Twenty-year-old mare goes lame in
 hock. If worked, and then allowed to
 stand, she goes very lame for a time,
 but gets better on exercise.

2. Give treatment for bone spavin.

3. Give prescription for good condition
 powder. W. P. G.

Ans.—1. She has a bone spavin, and
 it is doubtful if a cure can be effected at
 her age. Get your veterinarian to fire
 and blister the hock, and give her at
 least two months' rest—longer, if possi-
 ble.

2. As described for question 1. It re-
 quires a professional man to operate, as
 a bungling operation on the hock might
 give serious results.

3. Equal parts sulphate of iron, gen-
 tian, ginger, nux vomica and bicarbonate
 of soda. Dose, a dessertspoonful twice
 daily. V.

PYEMIA.

In June last, a hard swelling appeared
 in the throat of my sixteen-year-old cow.
 In a week the swelling extended to the
 incisor teeth, and she has had difficulty
 in breathing. She failed in flesh and
 milk supply. We poulticed it, and it
 broke and ran matter, and the swelling
 disappeared. In six weeks another lump
 formed. We blistered this, and it broke,
 and discharged a foul-smelling matter. In
 November we noticed one leg and
 shoulder twitching, and she soon died.
 We skinned her and found one side from
 head to tail discolored, as though she
 had been pounded. Now a five-year-old
 daughter of hers is affected in a simi-
 lar manner, but she has no difficulty in
 breathing. Is it contagious? J. B. C.

Ans.—The cow had pyemia (blood
 poisoning). It is probable other ab-
 scesses would have been found if a care-
 ful post-mortem had been held. It is
 not contagious, and it is very hard to
 say what caused it—some poisonous
 substance in the system. Poultice the
 affected parts of the young cow with
 hot linseed-meal poultices. Rub well
 with camphorated oil, and open all ab-
 scesses that form, and flush the cavities
 out well twice daily with a five-percent
 solution of carbolic acid. Give her 40
 drops carbolic acid in a pint of cold
 water as a drench three times daily. V.

HAVE YOU A BAD LEG

With Wounds that discharge or otherwise
 perhaps surrounded with inflammation and
 swollen that when you press your finger on the
 inflamed part it leaves the impression? If so,
 under the skin you have poison that defies all
 the remedies you have tried, which, if not ex-
 tracted, you never can recover, but go on suf-
 fering till death releases you. Perhaps your
 knees are swollen, the joints being ulcerated,
 the same with the ankles, round which the
 skin may be discolored, or there may be
 wounds; the disease, if allowed to continue,
 will deprive you of the power to walk. You
 may have attended various hospitals and had
 medical advice and been told your case is hope-
 less, or advised to submit to amputation; but
 do not, for I can cure you. I don't say perhaps,
 but I will. Because others have failed, it is no
 reason I should. Send at once to the Drug
 Stores for **ALBERT'S Grasshopper Ointment**
 and Pills, which is a certain remedy for the
 cure of Bad Legs, Housemaids' Knees, Ulcer-
 ated Joints, Carbuncles, Poisoned Hands,
 Abscesses, Corns and Bunions.

Snake, Mosquito and Insect Bites.
