SPECIFICATIONS.

14. FOR A MACHINE.

To all whom it may concern :

Be it known that I, William Woodworth, of the Town of Poughkeepsie, in the County of Dutchess, in the State of New York, gentleman, have invented

Certain new and useful improvements on planing machines, and I do hereby declare that the following is a full, clear, and exact description of the same.

The first part of my invention relates to the combination of rotary cutters and feeding-rollers, in such a manner that the said feeding-rollers shall be capable of feeding the lumber to the cutters, and also of effectually resisting the tendency of the cutters to draw the lumber upward towards them ; the object of this part of my invention being to reduce the lumber operated upon to a uniformity of thickness, and to give it a planed and even surface upon one side thereof.

The second part of my invention relates to the combination, with feeding-rollers and rotary cutters, for planing one of the principal surfaces of the lumber, of rotary machine cutters so as to form a tongue or groove, or both, upon the edge or edges of the lumber, at the same time that one of its principal surfaces is planed.
