THIS WEEKEND IN SPORTS—The Golden Bear hockey team travels to Vancouver for the second half of the Hamber Cup, the figure skating Pandas take on the University of Saskatchewan and the University of British Columbia in Saskatoon, the men's gymnastics team takes on the west coast crowd at UBC while the women defend U of A's honor at U of S. Self defence is the theme of the judo meet here as teams from western campuses meet to decide the first WCIAA championships.

Bears to tangle with Bisons in weekend basketball action

The Golden Bear cagers hope to improve a 4-4 won-lost record when they play University of Manitoba this weekend.

The games start at 8:30 p.m. today and Saturday and will be a definite factor in determining second place in league standings.

The Bears currently hold down

that spot, but the Bisons, who have won their last three starts and have a 3-5 won-lost record, are out to take over.

University of Alberta Calgary is in first place with a 7-1 record and University of Saskatchewan is last with 2-6.

The Bears will rely heavily on the jump-shooting of forward Barry Mitchelson who has led the team in scoring in four of the last five games.

The Bisons are a vastly improved squad compared to the one the Bruins beat twice in Manitoba last December.

They have one of the league's

best shooters and top scorers in forward Larry Zellmer.

Zellmer scored 41 points in two games the last time the two squads met.

Coach Munro, disappointed after his team lost two crucial games to Calgary last weekend, has his charges working on a full-court press defence.

Calgary used the press to good advantage when they beat Manitoba three weeks ago.

Manitoba played a man-to-man defence in the previous two games against the Bears but in past seasons has always played a zone so the Bruins will be prepared to face either.

POSTGRADUATE OPPORTUNITY

PATHOLOGICAL CHEMISTRY

BANTING INSTITUTE, UNIVERSITY OF TORONTO

Three Postgraduate Fellowships, initial stipends ranging from \$2,400-4,000 per annum depending upon qualifications, will become available during 1966 in the Department of Pathological Chemistry, Banting Institute, University of Toronto, Toronto 5.
