

GROUP OF CAMELS, NEAR THE PYRAMIDS.—The reason you do not see the Pyramids is that we are looking from them. Groups of camels are always to be found about the Pyramids. The sand is so deep in the neighborhood that travelers can hardly walk from one pyramid to the other. So Arabs are on hand with the camels to hire to people. A camel is very tall, but when you wish to get on his back he comes down on his all fours. So that it is quite easy to get in the saddle. But it is difficult to hold on while the camel is getting on his feet.
