ers and their Uses.

of fertilizers is a very large  
be dealt with in the public  
before one can understand  
tion and need of fertilizers it  
to know considerable chem-  
are attempting to teach  
fertilizers all teachers should  
ature and bulletins from the  
Department of Agriculture, or  
Dominion Chemist, Central  
Farm, Ottawa. The funda-  
are these: soils become de-  
nt food, and that the soil will  
different treatment or receive  
in some way before profitable  
e produced on them. One  
that a chemical analysis will  
ly reveal the actual require-  
e soil, and only by experi-  
the real facts be obtained.  
only require lime, and when  
ed the other plant foods be-  
le; other soils are lacking in  
phoric acid or nitrogen. All

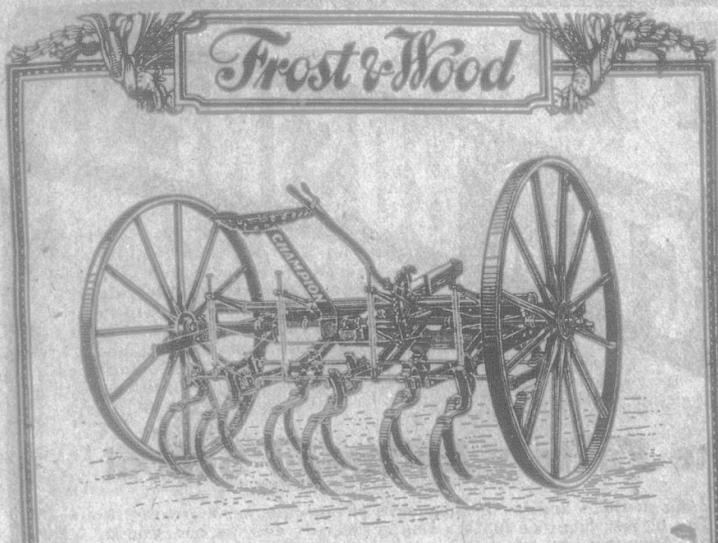

grain.

the same in their require-  
it is extravagant folly to  
ash for soils that only need  
phosphoric acid to make  
tive. On the other hand,  
quire potash more than any  
od, some are lime-loving and  
need phosphoric acid most.  
ts must have a good supply  
which usually comes from  
down of organic matter, but  
an be supplied in such forms  
soda, sulphate of ammonia,  
d. Some plot experiments  
s would reveal a great deal  
ow the relation between the  
of various soils and the  
different kinds of fertilizers.

t For Teachers.

ck's issue will be found com-  
of all the annual meetings of  
ve-stock breed associations.  
ngs are held annually in  
g the first week of February,  
of them serve as an annual  
progress made by those who  
the pure-bred live-stock  
ith each report will be found  
ers, including the secretary,  
nd address should be good  
or all public school teachers.  
good idea if school teachers,  
the recognized live-stock  
d get in touch with the  
the various associations,  
able to send them literature  
ous breeds, as well, perhaps,  
the prize-winning animals  
the bigger shows. This  
nd these pictures could be  
ction purposes in the school.

### Thorough Cultivation

Is one of the surest signs of an efficiently run farm. Keep down the weeds. Get the plowed land in good shape for the seed. It needn't be a hard task if you use a

### F. & W. "Champion" Spring Tooth Cultivator

Here's where Frost and Wood experienced design, and high-grade materials show their value. Strength and capacity for heavy, hard work are apparent in every part. The spring teeth, built of best quality spring steel, are strongly reinforced, and while one easily handled pressure lever controls the pressure on all, each group or section of teeth has its own pressure spring, ensuring uniform work. Two inch points are reversible—double life—or seven-inch points may be fitted to destroy thistles. Here's a splendid implement. You ought to know about it.

Built in four sizes. Can be fitted with grain and grass boxes for broad-cast seeding. Write us today for catalogue and see the "Champion" and other implements of our line at our nearest Agents.

## NORTHERN ONTARIO

A vast new land of promise and freedom now open for settlement to returned soldiers and sailors FREE; to others, 18 years and over, 50 cents per acre. Thousands of farmers have responded to the call of this fertile country, and are being made comfortable and rich. Here, right at the door of Old Ontario, a home awaits you. For full particulars as to terms, regulations, and settlers rates, write:

**H. A. MACDONELL,** Director of Colonization,  
**BENIAH BOWMAN,** Minister of Lands, Forests and Mines,  
PARLIAMENT BUILDINGS, TORONTO.

## In the seven fat years

the wise farmer prepares for the lean years that are sure to follow. Seven fat years for farmers are here. May the "good times" continue for seven times seven years.

An increasing number of farmers are investing their surplus money in Imperial Endowment Policies. They are taking no chances on the future. We think they are wise. Don't you?

Would you like to make sure that, come what may, you will be independent in your old age? Then fill up and mail the coupon below and we'll tell you how to do it.
