|------------------------------|--------------------------------------------------------------|----------------------------------|-----------|
| Magdelane,                   | Salmon river, clear.                                         |                                  |           |
| Dartmouth,                   | First class stream, flowing into Gaspé basin.                | Abounds with                     |           |
|                              | Salmon.                                                      |                                  |           |
| York,                        | Do.                                                          | do.                              | do.       |
| St. Johns, ( <i>du sud</i> ) | Do.                                                          | do.                              | do.       |
| Grand,                       | Fine Salmon fishery.                                         | Mill above.                      |           |
| G. Pabos,                    | Salmon fishery.                                              | Superior station.                |           |
| G. Bonaventure,              | Large and valuable stream.                                   | Many tributaries.                | Abounding |
|                              | with Salmon.                                                 |                                  |           |
| Cascapediacs,                | Both the little and great Cascapediacs yield high numbers of |                                  |           |
|                              | Salmon.                                                      |                                  |           |
| Nouvelle,                    | Good Salmon fishery in bay.                                  |                                  |           |
| Matapediac,                  | Considerable magnitude, and abounds with Salmon.             |                                  |           |
| Restigouche,                 | Noble river. Has fine tributary streams.                     | Salmon frequent                  |           |
|                              | it in large numbers, and of heavy weight.                    | Head of Bay                      |           |
|                              | Chaleurs.                                                    |                                  |           |
| Patapediac,                  | Branch of Restigouche.                                       | Salmon ascend it about 40 miles. |           |
| Mistouche,                   | Feeder of Restigouche.                                       | Salmon River.                    |           |

---

ADDENDA.—Nearly all of the Rivers described in the foregoing Schedule are tidal streams, and most of them have stationary Salmon and Trout fisheries within the émbouchure, and at bays, coves and inlets on either sides. Those upon the north shore of the St. Lawrence descend out of wild, rocky and mountainous country.

Most of these streams, with their numerous tributaries, and the large lakes at the head of each branch, present every variety of River and Lake adapted to the breeding and feeding of fish.

Where there are mill dams it is specially so noted. None elsewhere.

The names of certain Rivers at present advertised for sale are printed in italics.

The True Salmon (*Salmo Solar*), and the Tide Trout (*Salmo Trutta Marina*), are herein mentioned.

The Grand Trunk Railway, now in operation to St. Thomas, will be opened next autumn to River du Loup, 110 miles below Quebec. Passenger steamboats ply between Quebec and the Saguenay.

*Synopsis of the Laws and By-Laws now in force in Lower Canada, having especial reference to the preservation and regulation of Salmon and Trout Fisheries.*

#### ACT 22ND VICTORIA, CHAPTER 86.

Section 4. The Governor in Council to grant special Fishing Leases and Licences; and make all needful or expedient regulations for management and disposal of Fisheries.

5. General Superintendent and Local Overseers to be appointed, and paid by the Government, for each Province.

8. The Government may set apart any waters for natural or artificial propagation of Salmon and Trout.
