### DOVE ROCK DAY.

The girl had never been to Lake George before, and it was hardly her fault that she irretrievably injured her social standing before she had been at Horicon Ferry two hours. Grace Wright was an actress who had entered the theatrical profession as a chorus girl. She had now reached the rank of an ingenue in one of the popular theatres. Everybody at Horicon Ferry goes to the Landing to inquire for mail and to see what manner of people are going up the lake. The morning and evening steamer arrivals are the two incidents of the day, and John Treadwell was as curious as the rest of the little colony which dwelt on the point of land which juts out into the upper lake. He was helding a flaring red parasol over the head of his richest aunt, when he saw Grace Wright hastening over the gangplank. Before he could beat a retreat the girl had nodded to him, and he was compelled to acknowledge her salutation with a pertunctory dip of his hat.

The next moment, the girl had given her bargange to a porter, thereby proclaiming her intention of becoming a guest of Horicon Ferry's one hotel.

"I'd did not know," said Miss Jemimah Petting'll, sister of John Treadwell's mother, recently deceased, "that you had any acquaintance among the hotel people."

mother, recently deceased, "that you had any acquaintance among the hotel people."

"Well," replied the young man, nervously twisting his mustache, "a fellow who is a reporter on a New York newspaper, as I am, is bound to meet a few persons who are not eligible to the hamlet set at Horicon Ferry."

"I trust, nephew," said Miss Pettingill, "that you will remember that it is decidedly improper to mingle your business and social acquaintances. She is rather handsome, too. Has her mother with her. Evidently makes some pretense to respectability."

"Aunt Jemimah," said the young man, "the young woman is a member of Mr. Payson's company. She is a girl of sterling character. She has been on the stage almost from childhood."

From that day John Treaded, He was at Horicon Landing principally because his aunt had told him to come, and incidentally because the family of his fance, Agnes Shelton, had a cottage there. He thought rather guiltily of the evenings when he had called on Grace Wright, and of the talks they had had upon literature and the uplifting of the stage from its present sorrowful plight. They had read the same books, and had spent many an afternoon at the pleture galleries. That was in the days when he was struggling for bare existence upon a paper whose principal stock in radae consisted of nigardily pay to its reporters. He was glad in those days when the weekly payday arrived, and brought with it the blessed assurance that he might have breast of veal, with green peas, for at least one dinner of the could write, and he found himself unon

Rare Packs of Cards.

The oldest pack of cards found in the United States is a deck which was discovered in perfect condition in a closet in an ancient house in New Jersey. The date of the pack is of the time of Charles I., and the cards are of English make. Some very old playing cards have been found in the board bindings of early books. It looks as if illustrative art was used in the making of cards even before the pictures in books of religion, which shows that man thought more of his amusement than of the saving of his soul. At a recent sale in London some old playing cards were disposed of, says The Collector. A geographical pack, 1675 with the rare explanatory card describing other packs of the period, how he met Agnes Shelton. She thought that his life was "so interest-ing" and "so fascinating;" and he, who had almost forgotten the days when he was a drudge and a packhorse, never told her anything to the contrary. She had money enough for two. He saw his opportunity and availed himself of it.

told her anything to the contrary. She had money enough for two. He saw his opportunity and availed himself of it. They were engaged.

Grace Wright shw him once of twice after his rise in fortune. It was very easy for him to tell her that he could find no time to call upon her, for men who are under the beck and call of a city editor have little time that they may call their own. She saw him for five first time in months at the landing at Horicon Ferry.

The principal occupation of the so-called "society" element at Horicon Landing consisted in making life unendurable to the majority of those who came there. There were three distinct estates—the Hotel set, the Justin set and the Hamlet set. Anybody who had either owned or rented a cottage for three years in succession, was entiled to the rank of "Hamleteer." He had the right to snub anybody who came within sight of the little cluster of cottages at the end of the point. There was also an overgrown country farm house, not far from the hamlet, kept by the venerable Mrs. Justin. A few, and only a few, of those who stopped at Justin's were recognized by the Hamleteers. Those who stopped at he hotel were came to Horicon Ferry for more than one year.

After the strictest

They belonged to a class which never came to Horicon Ferry for more than one year.

After the strictest set of the Hamlereers was Miss Jemimah Pettingill, a cotager. It was her pride that in all the ten years she had been coming to Lake George no hotel guest had ever darkened her threshold. By right of seniprity, she was the social law-giver of Horicon Ferry; and Grace Wright had not been at the hotel more than three days before she was obliged to assert her authority. One of the Hamleteers, who had once seen the young woman in a nor Shakespearean role, insisted upon ting the girl to give an open-air readig. There was a brief, sharp struggle, ad the project was abandoned.

Grace Wright and her mother were mitted to go their own way. As we had little time to remain, we hurried as well as we could over the slippery rocks to reach the little terrace of rubble stones upon which the remains stood, a pile of reddish rocks scattered about by force, probably by wolves and bears. We gased on an Arctic grave for the first time. My feelings sent memory beckward. I could see the little schoon-frozen in, the men moving about building that little storehouse of stones, now tumbled down, carrying boxes of provisions and getting ready for a long writer.

I hurriedly made my sketch, while Lieutgnant Peary took photographs. We then collected a few relics, little pieces of broken bottles, gope, splinters of wood, some rusty bron eyebolts, and with uncovered heads we tenderly placed the skull and bones ogrether, replacing the stones and inscribing our names, upon the back of the headstone, placing it once more in position. Thrice the age of an eagle is that of an oak tree.

This is to assign the deer a period of more than 200 years; and the estimate is supported by many highly circumstantial stories. Thus, Capt. McDonald of Tulloch, who died in 1776, aged 86 years, is said to have known the white hind of Loch Treig for fifty years, his father for a like period before him, and his grandfather for sixty years before him. So, in 1826, McDonald of Glengarry is reported to have killed a stag which bore a mark on the left ear identical with that made on all the calves he could catch by fewen-Mac-Ian-Og, who had been dead 150 years. Analogous stories, it may be noted, are told in countries on the continent of Europe, where deer are to be found in any number. But, alasi the general opinion among experts would seem to be that thirty years or thereabouts is the limit of a deer's life.—Chambers' Journal.

Wasted Indignation.

The man with the florid face and the bold head grew more and more uneasy as he sat at the restaurant table. He tried to read a newspaper, but every now and then would drop it, adjust his glasses and glare up and down the room to find the waiter to whom he had given his order. At last he managed to detain him, at the risk of being scalded by the soup he carried, and inquired: "How about that dinner I ordered?"

"It will be here immediately, sir," was the answer.

The guest tried to read his newspaper once more, but as time passed his uneasiness increased until he was glaring up and down the room as fiercely as ever. He found his waiter again and the same conversation was repeated. After two or three more similar attempts he arose and went over to another waiter, who was gracefully leaning against a pillar.

"Look here," said the guest. "I want to know something."

"Yes," responded the waiter.

The Gentleman Who Has Amazed Al The Gentleman Who Has Amazed All England by His Resignati n.

The young Marquis of Londonderry, who amazed, all England by resigning from the Northern Union of Conservative Associations, and who was at once re-elected to the presidency of that organization, is one of the few Englishmen who hold to ancient ideas and who refuse to be admonished by the spirit of the times. This nobleman is now 45 years old, and he is descended from one of the proudest families in all Europe. He is the sixth 'earl of his title, and his blood goes back to the Vanes, the Tempests ad the Stewarts. The title of the family is Castlereagh, a title that was made infamous by an ancient statesman whom Lord Byron preserved in his verse as the archtratior to his country. But the mild-eyed young man who inherits the title to-day is in no way responsible for the sins of his ancestors, and, as a matter of fact, is not held for them.
