In Connection With the administration of the Yukon.

Favored Miners Get a Remission of the Gold Royalty While Others are Sold Out. Ottawa, June 19. - In the Commons yes

terday Sir Charles Hibbert Tupper, on motion to go into supply, brought up the case of the remission of a large amount of gold royalty to Alexander McDonald, the Klondike king, as to which the Government officials in the Yukon have never given any ficials in the Yukon have never given any satisfactory explanation. In a private let, ter from Mr. Ogilvie, however, to the minister, the matter was stated to have been most serious, and that but for Maj. Walsh's remission of this royalty Macdonald would have forfeited his claim. Yet no such clemency had been extended to other poor miners, who were obliged to relinguish their claims because of the collection of the 10 per cent royalty. Proceeding to quote per cent royalty. Proceeding to quote from available returns, Sir Charles Hibbert per cent royalty. Proceeding to quote from available returns, Sir Charles Hibbert said that the matter of the collection of the royalty, which Maj. Walsh in his time took peremptory control of, was in a state of mextricable confusion, proper returns being unavailable. Moreover, that in this connection Mr. Wade again figured as counsel for Alexander Macdonald and advisor to Msj. Walsh, and that the Auditor General in his report attested to the fact that the royalties were put in charge of the mounted police, showing that they would now be certain to be collected. Sir Charles concluded with a motion charging Maj. Walsh with crime and misbehavior in office; that officials had been guilty of directly and indirectly receiving gifts; that Maj. Walsh illegally extended the time-for collection of Macdonald's royalties, and he urged that a complete audit of the accounts of Alexander Macdonald in regard to royalties due by him to the Government be made; also an inquiry into the indulgences shown to him and the connection of Maj. Walsh and Mr. Wade and other Government officials in connection therewith.

ONLY TECHNICAL. ONLY TECHNICAL.

Mr. Sutherland, the acting Minister of the Interior, referred to Sir Charles Hibbert Tupper's charge of last year as "a wicked speech," which he was now trying to excuse by drawing up resolutions constructed out of fragmentary correspondence and the like. Whether Maj. Walsh asted illegally or not, the fact was that the Yukon was a long distance off, and it was necessary to make allowance for him necessary to make allowance for hir

and to give him extraordinary discre-tion. As for non-collection of revalty the honorable member, as head of the justice department, had allowe the justice department, had allowed people to get in arrears for binder twine, and much of the money had not yet been paid. Macdonald, he claimed, had since paid up all his back royalty. It was, at the worst, but a technical violation of the law. Mr. Borden briefly reviewed the case and showed the necessity for a thorough accounting in this matter, 'He did not quite comprehend Mr. Sutherland's "technical violation of the law." If a man broke into a house and cleaned it out it would be 'a technical violation of the law,' according to the acting-minister of the Interior. He thought Major Walsh could surely find time from the congenial occupation of getting claims for his bathers to the second proper statement. brothers, to give a proper statement of this transaction. He instanced the case of the mining royalties in Nova Scotia, under which mine owners were obliged to pay up promptly

A LOT OF SMUGGLING. Mr. Fraser, replying, contended that there was nothing in all these charges—they were simply wearying the country. In the course of his remarks Mr. Fraser, who has been in the Yukon, admitted there was a lot of god smuggled out of the country. Yukon, admitted there was a lot of gold smuggled out of the country without paying royalties. Mr. Clancy followed, pointing out the necessity of a thorough investiga-

Mr. Foster reviewed the transac-tion, showing that while, as the act-ing-minister stated, the order-in-coun-cil empowered Major Walsh to amend and alter the regulations as seemed to him necessary, he had in this case acted without due proclamation of his exercise of authority, and no affidavits were extant showing the

affidavits were extent showing the amount of Macdonald's output.

Mr. Fielding cited the case of the Blockhouse mine (at Port Moriel, N. S.,) in which Mr. Borden was engaged professionally, where extension of time was granted extending over a long regree of the state of the sta Mr. Borden replied that to his

knowledge extension of time was not only refused to the Blockhouse Co., but they actually sold out the property of the mine.
To this Mr. Fielding answered he had permitted extensions of time to

had permitted extensions of time to be granted in many cases.

Mr. Foster asked if the Minister of Finance would send a telegram to Mr. L'thgow, the auditor in the Yukon. asking him if there were affidavits of output in Macdonald's case.

Mr. Fielding said he would prefer Mr. Lithgow's statement in full to any "catch telegram," and Mr. Lith-gow said he had gone over the whole matter with the gold commissioner, and arrived at a settlement as re-

gards Macdonald's back royalty.
The House then divided on amendment, which was negatived by

"HUNGER IS THE BEST SAUCE," Yet some people are never hungry. Whatever they eat has to be "forced down." There is, of course, something wrong with these people. By taking Hood's Sursaparilla a short time they are given an appetite and then they enjoy eating and food nourishes them. If you find your appetite failing, just try a bottle of Hood's. It is a true stomach tonic and every dose does

CHATHAM'S FINE WATER.

Dr. J. L. Bray, chairman of the waterworks, has received from Dr. J. H. Bryce, secretary of the Provincial Board of Health, the following letter, which speaks for itself: "In response to your request, I beg to say that it will be remembered that the source of supply from the River Thames was approved of by the Provincial Board of Health in a formal way on May 29th 1895 on condition that filtration 29th, 1895, on condition that filtration methods of the most approved charac-ter be carried out, and that the source ter be carried out, and that the source of supply be protected in every way possible. You will find the report of this board in full in our annual report for 1895, page 64. If you have not a copy you can borrow the copy belonging to the city clerk, I am happy to say that the bacteriological and chemical analysis since the filters were put in and especially since the sedimentain, and especially since the sedimenta-tion basin was put in, show both chemically and bacteriologically, a water of the highest character. For in-stance, I find that in an analysis made in November, 1899 by Dr. Mackenzie, the filtration had been so complete as to reduce bacteria to a point which may be called practically sterile water, while the free and albumenoid ter, while the free and albumenoid ammonia shown by chemical analysis were equally satisfactory. It will thus be seen that the formal approval of the Provincial Board, given in 1895, with the proviso of good filtration methods being instituted, has been fully complied with. I have therefore to say that the water supply of the city of Chatham fully conforms to all requirements of the Provincial Board of Health, as set forth in said report."

PLENTY OF GOLD.

Reports From Cape Nome Indicate Rich Hauls.

The Mining Area Much Larger Than was at First Supposed.

Vancouver, B. C., June 19. - That the gold fields in Cape Nome are the gold fields in Cape Nome are richer and more productive than has yet been reported is the story brought down by the steamer Alpha, which has arrived from the North after having been reported lost at sea. According to stories of those who returned on the Alpha, one claim, worked by 20 men, panned out \$56,000 in four weeks. There were five passengers on board the Alpha and four of them claim to have brought back a total of \$250,000 in dust:

April 5, clearing for St. Michaels. He says that he was so menaced with icebergs as he approached St. Michaels that he proceeded to Nome, landing 153 passengers and their supplies on the beach on May 25 and sailed for Vancouver on May 30.

The gold producing area of Nome, it is reported, seems much greater than was at first supposed, and all over the country men are reported to be washing out 15 to 20 cents to the pan in gold.

A SAMPLE OF WHAT SATISFAC-TION A GAS RANGE GIVES.

P. S. Coate, Esq.,
Mgr. Chatham Gas Co.
Dear Sir.—
Having used a gas range for the past two years, I am in a position to state that for economy, speed either one, or the whole of the above and cleanliness, it exceeds all other means of cooking. Anyone desiring very essential features of housekeeping, should not hesitate in the use of one without delay.

In dust:

Unusual interest has followed the Alpha's trip, not only because she was the first steamer to sail for Cape Nome, but on account of international complications, the Alpha being a Canadian boat and Nome not being a sub-port of entry. But the skipper had no trouble with the customs regulations. He sailed from Vancouver
