The following letter was handed to us for pub- of it, or not, at their own option. heation, and we recommend attention to the subject on which it treats:-

> OFFICE OF THE BOARD OF TRADE, Montreal, 8th Jan., 1848.

Sir, -for your information, and that of the Trade generally, I am directed by the Council of Agriculture, in Connection with Colleges this Board, to transmit to you the annexed copy of a letter addressed to them by Francis McDon nell, the Inspector of Butter, temporarily appointed in October last, as the Council consider

It is the intention of the Board to petition the in packages of the description provided for in the Act. One of the intended provisions of the Act, I am directed to state, is, that Butter Kegs or Firkins, shall be made of White Ash Wood, that being in every respect the most suitable.

EXTENSIVE IM

to arrive by the first Spri

State University.

Ireland and Scotland are both becoming alive to the importance of raising the business of agriing a sufficient quantity of White Ash Staves prepared and properly seasoned, ready for making (which will establish the size and form of the Firkins to be used,) shall have been promulgated. Copies of the Act will be extensively circulated, for all the purposes of the Trade.

In conclusion, I am directed to draw your atof the various recommendations contained in Mr. labour in Canada, it is important that those emMcDonnell's letter, not only because many of ployed in it should thoroughly understand the tention to the importance of a careful observation enactment, but because the obvious tendency of the farm, and be able to trace effects to their true their adoption is to increase the value of the article, cause. Modern philosophers have clearly illusand to establish for Canadian butter a higher character in the foreign market than it could otherwise attain.

> I am Sir, Your most obedient servant, FRED'K. A. WILSON.

> > (COPY.)

MONTREAL, 18th Dec. 1847. To the Chairman and Council of the Montreal Board of Trade.

256 kegs first quality. 1920 do second do. 1813 do third do. 559 do fourth do. 136 do fifth do. 38 do Grease.

The large proportion of inferior quality, I attribute principally to the short notice given of the the efficacy of the various modes of under-draining, intention to establish an Inspection, in consefor the requirements of such a system.

Very little Dairy-packed Butter came under I have seen some Butter which was strongly flavoured with leek, and thus rendered most unpalat

remedied, that I beg to submit the following to the country than any other single measure that suggestions, for the regulation of the trade, in this can be framed.—Agriculturist.

on each one. None but well seasoned wood! before being brought to the store. The firkin paring, they have forced me, like a coward in a in other respects, shall not pass inspection as first above by that gifted sculptor, is like a similar re-

and Universities.

The above is becomming a favorite movement in various parts of the United States, and it is it contains some useful directions for the proper thought that should the experiments now being making and packing of Butter, as an article of made prove successful in accomplishing the results the friends of the cause anticipate, liberal provision will be made by the different State Govern-Provincial Parliament at its next session, for an ments, for the establishment of agricultural chairs Act to establish an Inspection of Butter, to take experimental farms, in connexion with their prin-Act to establish an Inspection of Butter, to take effect as early in the season as new Butter is likely to be brought into market—probably in July or August. It will be necessary that some time should elapse, between the passing of a Butter Inspection Act and its becoming Law, as its requirements must be made generally known before they can be complied with the season as new Butter is cipal collegiate Institutions. The Eastern Colleges have notly set the example, in bringing about this truly great reform; and we learn that Professors the latter of Yale College, have been very successful in practically applying and illustrating the science of Agriculture to the valence of the season as new Butter is cipal collegiate Institutions. The Eastern Colleges have notly set the example, in bringing about this truly great reform; and we learn that Professors the latter of Yale Collegiate Institutions. ful in practically applying and illustrating the science of Agriculture to the understandings of the from this date to sell off the remainder of their stock fore they can be complied with. It is not contemplated to make the Inspection of Butter compulsory, but optional as in the case of Flour, but no Butter will be eligible for inspection unless to be paratively small and new state of Georgia, has

Every Country Merchant, Dairyman, or other culture to a standard which will entitle it to rank, person engaged or interested in the packing of England is not lagging in the work, and there is no doubt that agricultural schools, in connection with example or pattern farms, will become very into Firkins as soon as the Act of Parliament general in Great Britain and Ireland before many years. Indeed, Government has already made provision for the establishment of educational institutions of this description in each county of the and published in the public prints, in ample time latter country. If properly managed they may be made nearly self-sustaining, especially if established upon the basis of those that are being put into operation in Ireland.

trated the applicability of science to agriculture, and why should not the agricultural youth of the derived from a knowledge of the important facts it one of the first Towns in Canada West. that have been so clearly revealed to us by a At present our Farmers and Merchants, at great very trifling cost, by any youth who has a desire per cwt. to become acquainted with them. The science He has been furnished with a large quantity of of chemistry, botany, geology, and mechanics, should be taught in those Academies, where our will commence an EXCLUSIVELY Gentlemen, - I beg respectfully to submit the should be taught in those Academies where our following Report of the progress made in the wealthy farmers' sons are being educated; and Inspection of butter since my appointment as In- even in the Common Schools we may hope that through the agency of the Normal School, a taste The prices will be fully as low as those of Toronto The quantity of Butter inspected and branded will be imparted to the rural population for the or Hamilton, and the Terms as liberal. from the 23rd October, (the commencement of my study of such sciences. We look to our Provincial No Second Prices; for business will be to operations,) to the 8th instant, (the close of the University of King's College to set an example in the most honourable way. season,) is 4722 kegs of various qualities, as fol- in this great national enterprise. It is so richly endowed that a few costly experiments in practical agriculture would not be seriously felt. A respectable farm, placed under proper management, in connection with this Institution, would have a very wholesome influence on the productive interests of this Province. The cultivation of new crops, the application of new machines to the various operations on the farm, the testing of

sub soiling, and tilling the land, and not least, the quence of which the trade was totally unprepared careful analysis of soils and plants, would all form an important part in ameliorating and elevating the condition of the Agriculture of Canada. Agriculture is now acknowledged on all hands my notice, the quantity inspected being nearly all to be of the greatest importance to all interests. Store-packed, and put up in a very slovenly manner. In some packages the Butter was thrown mainly dependent upon the productiveness of the in in Rolls as received from the producer, in soil. It is, therefore, to be hoped that the Canaothers, made up of various colours and qualities mixed altogether, obliging me to give a low character to the whole package, others contained there had large their control on such a footing, that a sound practice of the control on such a footing, that a sound practice of the control on such a footing, that a sound practice of the control on such a footing, that a sound practice of the control on such a footing, that a sound practice of the control on such a footing, that a sound practice of the control of the c several pounds of salt on the top—others had large quantities of coarse salt mixt in with the Butter, and our land, calculated to further the development of the great resources of the country. We shall, as soon as we can find time to digest some ideas The irregular size and slovenly appearance of for the promotion of Agriculture, lay our scheme

AND KENT, AND THE TOWNSHIPS OF LONDON AND WESTMINSTER.

Sores; diseases of the Chest, such as Asthma, Tightness of Breath, Pains, Weakness, Dyspepsia; also, Constipation of the Bowels, Croup, Cutaneous Eruptions, and all diseases of the Skin; in short, nine-tenths of the diseases in our country are produced by this one thing—checked percentage of the very such as a Liberal paper: that will be its character in relation to political parties. It will also advocate Canadian Nationality, so far as is consistent with the most cardial adhesion of the people of our country are produced by this one thing—checked perspiration.

The only advadtage the All-Healing Ointment has over other remedies, lies on this one thing—the restoration of the Insensible Perspiration. This will be seen by contemplating the following fact:

Will also advocate Canadian Nationality, so far as a consistent with the most cordial adhesion of the people of Canada to British connection—a Nationality that will unit the inhabitants of Canada in one compact body, for the purpose of advancing their common interests.

In addition, the Western Canadian Nationality, so far as a consistent with the most cordial adhesion of the people of Canada to British connection—a Nationality that will unit the inhabitants of Canada in one compact body, for the purpose of advancing their common interests.

In addition, the Western Canadian Nationality, so far as a consistent with the most cordial adhesion of the people of Canada to British connection—a Nationality that will unit the inhabitants of Canada in one compact body, for the purpose of advancing their common interests.

In addition, the Western Canadian value of the people of Canada to British connection—a Nationality that will unit the inhabitants of Canada in one compact body, for the purpose of advancing their common interests. contemplating the following fact:

Ist. That five eighths of all we receive into the stomach pass off through the pores of the skin, in Insensible Perspiration.

2nd. That the skin evacuates more matter than the Lungs, Kidney, and Bowels pct together.

3rd. That the skin discharges more matter in twenty-four hours, than the Bowels do in fourteen days! and that, by severe exercise, a man will lose three, four, and even five pounds in one hour.

4th. That the Creator pierced the human cuticle with pores or small openings to the almost incredible number of pores or small openings to the almost incredible number of 600 million, making this the grand outlet of all the reon million, making this the grand outlet of all the redundant matter of the body.

5th. That through these pores are constantly exuding the old, altered, and worn out particles of the blood, the humours of the body and the waste of the system.

6th. That to stop up these pores, twent-four hours would considered to the local particles of the passions, fashions, follies, or errors of the day. In religious questions, so far as it may be proper for sanction, direct or indirect, to the passions, fashions, follies, or errors of the day. In religious questions, so far as it may be proper for sanction, direct or indirect, to the passions, fashions, follies, or errors of the day. In religious questions, so far as it may be proper for a secular journal to interfere, it will take the broad foundation of those principles of the New Testament which are admitted by all who recognize its absolute.

ocause instant death.

7th. That sudden changes of weather and exposure to cold close these pores in part, and hence the long catalogue of diseases over the land.

8th. That as the skin is the medium for evacuating all the humours of the body, we see the westerned followed followed by the humours of the body, we see the westerned followed followed advected and owner of the reads. THOMAS B. FRENCH,
