Public Meeting to Discuss Obiects of the British Empire League.

**Patriotic and Eloquent Speeches** by Prominent Citizens--**Endorsation of Work-**

A meeting of the British Empire League, with the mayor in the chair, was held last night, and was numerously attended by an enthusiastic audience, who loudly applauded the sentiments of united Empire uttered by the various speakers. Several members of the provincial house were present, including Hon. R. McBride, Mr. Brown and Mr. Hall.

The Mayor read letters from the Bishop of Columbia, heartily approving the objects of the league; also from Mr. Thos. Earle, M.P., Senator Templeman, Col. Prior, M.P., Senator Macdonald, Hugh Gilmour, M.P.P., Col. Gregory and Hon. D. M. Eberts and others.

He related an incident of a young Canadian in London, who had lost both feet in South Africa. He was just such a colonial and many others were the same, though they, nor their parents, nor their grandparents had called England home. They were colonial Britishers. That was just what he was, a colonial of colonials.

He said possibly he was the only person in British Columbia today who had written an editorial on July 1st, 1867, the day of Dominion confederation. He had in that article said the confederation was but a prelude of a greater federation. He did not claim to have originated the idea, as he had heard it from Joseph Howe, the eminent Nova Scotlan statesman, and he had heard that other great orator, Lemuel Allan Wilmot, speak in flowing teams of the time when the whole British Empire would be federated. So the idea was not a new thing, but our institutions, like our freedom, have "slowly broadened down from precedent to precedent," and we must permit the sentiment of imperial unity to develop and not try to force any cut and dried millennial on Alfred the Great, and we are

On March 16, Lord Kitchener received Gen. Botha's acknowledgment of the receipt of the letter.

"I had advised my government," wrote Gen. Botha, "of Your Excellency's ietter, but after the mutual exchange of views in our interview at Middleburg, February 28, it will certainly not surprise Your Excellency to know that I do not feel called upon to recommend the terms of said letter, but they shall have the earnest consideration of my government. I may add that my government and my chief officers here entirely agree with my views."

Bloomfontein, Orange River Colony, March 22.—Military operations in the southeastern part of the Orange River Colony are progressing. Major Julian Byng has brought in 300 refugees, 16. 000 cattle and 40,000 sheep from the Wepener and Smithfield districts. Col. Bethune has sent in seventeen prisoners from Thaba N'chu. Three hundred prisoners are now camped here.

The conditions regarding assistance to the farmers, fire arms, etc., are the same as those in Lord Kitchener's replies to Gen. Botha. Sir Alfred Milner adds that he agrees to the above except as to the desires for modification regarding British subjects in Cape Colony and Natal in the Boer army; who, if they returned to those colonies, would be liable to be dealt with under the laws of those colonies passed to meet circumstances arising in war.

He added: "While I am willing to concede much in order to strengthen

The latter concludes: "I must inform Your Honor that if the terms now offered are not accepted after a reasonable delay for consideration, they must be regarded as cancelled."

CARE OF GARDEN ROSES. Roses should be grown in an open place sheltered, if possible, by surrounding veg-etation at a distance, from tempestuous winds, especially cold and bleak ones. An aspect facing south-east or south-west is the best, arranged in such a way that during the hottest hours of the day in sumduring the hottest hours of the day in summer, the rose garden may obtain a little protection from the fierce rays of the sum by the east shadow of trees or bedges. The ideal soil for roses is a rich tibrous loam, "unctous loam" as it is called, that feels somewhat greasy when pressed between the fingers. It is not always possible to attain the ideal, nor is it really essential, as good roses may be grown in ordinary garden soil always provided the rose grower is industrious and a good cultivator. Where soil is light, the addition of loam or clay will improve its texture for the purpose.

During the flowering period, one ounce of nitrate of potash and one ounce of phosphate of potash to one gallon of water makes a good stimulant for out door plants but plants in pots should have at least twice as much water. It is very necessary especially in light soils to keep as much moisture as possible in the soil during the summer. A good mulching of cow manure or rotted leaves, not only retards excessive evaporation of moisture from the soil, but also prevents it being cracked and baked by the sun. Next to a good mulching in value, is the constant cultivation of the surface soil to the depth of about two inches, the fine topsoil then acts as a mulch and checks evaporation..—Ornamen tal Gardening.
