travelling in Switzerland and the Tyrol during the past two years.

Although the thieves, consisting of well-dressed men and women, must have disposed of some of the booty, the police have at least 100 articles of great value, consisting of diamond tiaras, sings, brooches, pearl necklaces, gold watches, chains, bangles, etc., in their neasession

their possession.

The Berne police have photographs of the stolen goods, which are at present in the charge of the chief of police at Bozen where the gang is awaiting trial. Most of the thefts took place in Swiss hotels. About \$1,250,000, it is stated, is the value of the stolen treasures.

TOLEDO, Ohio, Feb. 4.—Unable to effect an organization because of the deadlock over the admission of the miners' delegates from Illinois, the joint wage conference of the bituminous coal operators and miners of Ohio, Indiana and Pennsylvania, adjourned tonight sine die.

Among the speakers at the morning session was Dr. S. F. Tolmie, who dealt particularly with the desireability of better bred mares being brought into the province. If the Dominion government granted reduced freight rates on imported horses this result might be accomplished. In light draught horses Ladner was at present producing a better breed than could be found anywhere else in Canada.

Nelson-Wolgast Fight at Oaklands.

SAN FRANCISCO. Feb. 5.—The question as to who will get the contest for the lightweight championship between Battling Nelson and Ad. Wolgast was apparently settled today when Manager Sid Hester was granted a permit by the city council of Richmond to conduct the fight there. It is said the construction of the arena will be begun immediately. Richmond is a few miles from Oakland.

MAJOR MOODY DOWN FROM THE NORTH

Famous Officer of R. N. W. M. P. Returns From Six and Half Years' Service at Hudson's Bay

WINNIPEG, Man. Feb. 4.—Major Moody, one of the most famous of the R.N.W.M.P. force, is in the city today on his way to headquarters at Regina, after six and a half years service on the Hudson Bay country. The Major is one of the trail blazers of the force and when there is any difficult task to accomplish, he is usually the man selected to do the work. In 1896 he was sent into the Yukon by the overland route. In 1903 he went WINNIPEG, Man. Feb. 4.-Major

During his three years stay at this post the Major was called to Ottawa and placed in charge of the steamer Arctic for its crulse around the Hudson Bay and Arctic regions. He came south with the Arctic in 1905 and went north again the same years.

Body Which Will Investigate Charges
Made by Lumsden Regarding
Over-Classification

South with the Arctic in 1900 and the Neptune.

A Thrilling Time. the results of such work as was carried on were not satisfactory. The fee had only been \$1.00\$, and yet the mem bership did not increase. Mr. Puckle felt that the fault lay not in the matter of fees but in the association itself. It was his sincere opinion that the whole body should be reorganized.

Big Meeting at Kamloops.

Considerable discussion followed among the members who were present and W. E. Scott, deputy minister of agriculture, after it had been explained that there was a suggestion to have the department of agriculture; made an address in which he told of the arman and which he told of the arman address in which he told of the arman address in which he told of the arman and which is to investigate Mr. Hugh Lumsden's charges against a portion of his former engineering staff. Messrs. Goeffrion, (Chambly), Machanda, Clark, (Essex), Wilson, (Lacal) Geoffrion will likely be the Chairman ber of days and were on half rations I Toronto, Feb. 3.—A committee of four days. They however pushed on in the hope of striking some game with which to replenish their stock of food but being unsuccessful they turn-

that the weather has been very mild this winter and 33 below was their coldest day.

The major and his party left on their trip on December 28 and they averaged 35 miles a day all the way dayn. Sergif Nicholas, and two constables come out with the Major and in addition to this an Eskimo driver and an interpreter came as far as Gimil. The Eskimo has never been south and as the weather is not cold emough to suit him he is going right back to the Bay.

Major Moody is deeply interested in the Hudson Bay Rallway and he was anxious for all particulars as to the progress of the plans to build this road. Having been stationed at Churchill for a number of years he naturally favors that port for the neutrally favors that port for the comminal, and says that it is always open before the Nelson River. The ice he says drifts down into the mouth of the Nelson river and blocks navigation. He thinks it would take two million dollars worth of dredging to make the Nelson harbor as good as the one at Churchill is now. one at Churchill is now.

"Companies Act, 1897,"

CULURE, TRAINING AND OF SWEET PE

By James Simpson, 1519 Bl The Sweet Pea as a garden to great prominence within th and is at present a universal garden; but still 95 per cent of it are much behind the times of growing them, and to such marks are meant to apply, and ited few on Vancouver Island very near to perfection. The pleasure in saying that he ne Sweet Peas even in Britain th in Victoria.

To be successful in their gre give them two feet of good soil well drained, or at least make does not get waterlogged. Give abundance of thoroug

manure, especially if any is w purposes; if flowers only are manure need not be of a nitro as Sweet Peas have the faculty, whole of the natural order legu tracting nitrogen from the atm is left in the ground only if the allowed to seed. The next poi is sowing the seed or planting t rule the amateur grower sows too thick, and does not thin or owing seed is preferred, it sho seeds every foot run and thinned the plants are about 2 inches in seed, if the ground is in good too wet, should be sown in F sowers prefer to sow in a cold fra border and transplant. If this ferred, the transplanting must fully done, or the plumula, or of the root, will get broken and do little or no good. In plantir foot apart in the line; the future sists in simply keeping clean, dance of water, after they are feet high, seeing that they are p on the wires, and, above all, pick ers off before they form a seed pothing has been done in first-cla vines should grow to from 10 height, and strong accordingly.

Training of the Sweet Pea cor in having a thoroughly good tre commonly used one is ordinary ting, more or less in height and badly fitted. The writer does not this, as it interferes greatly with In a long line, for instance, if you see a flower you wished, or an in pod you wanted picked off, you to go round a pretty long line in to get it. A far better plan, in my to erect a trellis of 2 x 1 inch dre one every 6 feet is close enough them at least 7 feet above the surun horizontally thin galvanized 6 inches and also perpendicularly strength of wire; wind the one rour where they cross each other. Thu a trellis in six inch squares as tight string, and the size of the mesh all get the hand through anywhere purposes. And last but not least train the young vines backwards wards as they grow up, and the winds tearing them off.

Varieties are now so numerou difficulty for the amateur has bee take; but here the National Sweet F of Britain has given last October the best varieties in their various see as this has been done after very rials, their selection may be thorou on. It must be understood that they with varieties that are in commerce, as follows. Those marked with
