GARDENING.

Directions for planting each vegetable of the most common kinds.

Cabbage. The early kings may be sown striped bugs which can be found upon them, in hot beds, in the latter part of March, and in a few weeks they will be fit to transplant are beyond their reach. The best Cucumbers in a few weeks they will be fit to transplant in the open ground. Or, they may be sown a little later in a warm boarder under the south side of a board fence. Red cabbage may be sown carly in may, and Saroys and the large-winter drumhead, almost any time incluse american and sown in drills a toot or eighteen the incluse american and size or eighteen during the month. Cabbages should be trans-plasted into very rich ground, for this general rule applies particularly to the n, that all ve-est, and the Long Orange the best for main getables where the growth of leaf and stalk is the chief object, are greatly benefitted by co-pious manuring. When transplanted, the should be sown as soon as the ground is open

small early cabbage, as the early sugar loaf and main crops deferred till warm weather in and the early York, should stand about two teet apart, and those larger a greater distance manure, and may be sown in drills one foot according to their size, the large winter drum- apart and one or two inches deep, about three head, for instance, should be at least three inches spart in the drills, alterwards to be

leet.

Broccoli .- The purple Cape is the only of the best for eating are the Sugar and Red variety, we would recommend for common cul. ture ; those who wish to rate the other kinds Parsnips should be planted as carly as pos must consult books on gardening, as they re- sible, in drills, like beets, and in corrmon quire care and minute directions. The Pur- with all agot crops require a well manured ple Cape should be sown about the middle soil, of May, and when of suitable size should be

of May, and when of suitable size should be *Parsley* should be sown early in drills one transplanted in uncommouly rich ground, and they will produce fine heads early in nutumn *Selsify* or vegetable syster, requires the Cauliflower. This requires more care than same treatment as carrots and parsneps. the last; it commonly succeeds best when Onions may be sown about the middle of sown early in fall, and transplanted istto beds April, and buried half an inch deep in drills

which are protected from the winter by frames twelve inches apart. When of suitable size and sash, and mats. It succeeds well, how- they are to be thinned to about a distance of ever, if sown very early in a hot bed, and two or three inches in the drill. One of the afterwards transplanted, as the plant becomes best varieties is the Silver skinned ; the atraslarger, into a later hot bed, and finally into open ground in the later part of April. These if well managed will produce heads in June. If sown early in May, cauliflowers may be treated in the same way as Parple

Cope Broccoli, and with nearly the same suc-cess. Kale and Brussels Sprouts may be sown good garden soil. If transplanted too early,

shout the middle of May and transplanted it will be hurt by frost. early in July in rich ground. They are used *Celery* should be sown as soon as spring opens, in drills half an inch deep, and after-Asparagus. The seeds should be sown trenches for earthing. wards transplanted in open ground in proper

reaches, drills about one foot apart. They is the tools penetrate to a great depth, and into beds when a year should be sown as early in the spring as the tools penetrate to a great depth, and that they will not, however, produce good state of the ground will admit, in drills, an into the penetrate they have be transplanted into beds when a year should be sown as early in the spring as the old. They will not, however, produce good state of the ground will admit, in drills, an shoots for use in less than three years. An inch and a half deep, twelve or fifteen inches aspiragus bed properly prepared, will con-tinue to afford crops for twenty years or more. When a year old they are to be transplanted New heds are made by, transplanting thus, dig the ground eighteen inches or two feet deep in the form of a broad trench, fill this trench with alterna e layers of soil and manure

"Consider the lilies of the field how they grow. they toil not, neither do they spin."-Matt., 6 ch .-Verse 23.

The Gop, who does the tempest wield, And send it on its destin'd way-He rears the lilies of the field, And decks them in their bright array.

When the dark sky the lightning streaks, When waves on waves in fury press, We list, as thus in wrath fits speaks, Shaking our bosom's wilderness

And shall we not that yoice attend, Which bids us mark the lowly flow'r-Mark how in taithful union blend

His fost ring care and forming pow'r ? Whene ar with anxious thoughts opprest, We would our hearts to sorrow yield,

Let us the spreading cloud arrest, And note the lilies of the field:

No robes of silk, with broider'd hem, Such texture of such beauty show ; Nor doss the jewel'd diadem Of Eastern King so richly glow.

Erst in soft bow'rs of Paradise, Where all was guilelessness and bloom, Before was heard. Sin's fell device; Or uttered Man's primeyal doom,

They scattered fragrance through the nir, And wore their gay and shining dress, Pride of the charms, that cluster'd there, Of innocence and loveliness.

Still, on the curst and guilt-stain'd Earth They bloom, as in that happy time ; Still, joys attend their vernal birth, As when they sprang in Eden's clime.

And still, as they, sweet relics, blow In mid-wood glade or open dell-Thro' sunny weal and stormy woe, The story of their trust they teil.

From them a lesson let us learn To calm our fretiul heart's unrest Let us to Gop for succes turn. Who wraps them in their gorgeous vert.

He knews and will our wants supply : We are more precious in His sight : The flow're will wither burn and dia-But we shall live in endless light.

cinated; he fancied that he loved, but the slave of appetite seldom feels a pure or per-manent affection! The Prince was then to unlimited confidence, which was ever obsteeped in dissipation, and in debts-poor served by her with sacred inviolability. The Perdita had been some time abandoned, and honor, frankness, and straightforwardness of he felt that vacancy of heart which often in-vades the mere man of pleasure, who has no useful or ennobling pursuits. With the ex-of the times in which she lived ; and many citement of youth, he had all the advantages of them are still alive, and can bear witness that his high rank, joined to personal attrac-to the truth and fidelity with which this pertions, and magnets of the highest polish, could give him. There were then few wo-men who would not have been dazzled by have continued to regard her. the homage of such a suitor ; he had knelt In her more familiar sircle she was generous, to others, and seldom found rejection.

Number 21.

"Sait lightly won, and short-lived pain, For princes selding sue in vain."

But airs, triznerbert was her the to chagner, Her file was one of active benevo-enry "light-winged tops of feathered Cupid;" Her file was one of active benevo-her heart was the shrine of virtue, and no worshipper dared approach, except in honor-able gaise. The prince saw that any other she was herself afforded by making others siege was vain, and influenced alike by past sion and vanity, he offered his hand to the most Wrs. Fitzherbert departed this life on beautiful woman then within 'the glittering Monday the 27th March in the Bist. year circle of the British court. After long and ardent solicitation, a secret marriage was the result ; the Prince and Mrs. Fitzherbert, who was a Roman Cathol.c, were united, by the Mr, Biddle's letter on the Bank's stopping ceremonies of her own, and the Protestant payment in Specie:church. The marriage was perfect in the eye of heaven, but it was void according to the law of England. The statute 12 Geo. III, passed soon after the marriage of the then Duke of Cumberland with Mrs. Horton the sister of Lutirell, afterwards Lord Car hampton, enacted, "That no descendent of the body of King George II., other than the issue of princesses, married into toreign families, should be capable of contracting matrimony, without the pravious consent of the King, signified under the great seal; and any marriage contracted without such con-sent is void-provided that such of the said descendants as are above the age of twentyfive, may, after a twelvemonths' notice given to the King's privy council, contract and solemnize marriage without the consent of the Crown; and as both Houses of Parliament shall, before the expiration of the year, declare

indulgent, and hospitable. She retained in advanced age the warmth the enthusiasm, the freshness, and disinterested feelings of youth. But Mrs. Fitzherbert was not to be crught by Her life was fervent and unoscentations .-

of her age.

payment in Specie .--

We extract the following paragraphs from a letter addressed lately by Nicholas Biddle (President of the U. S. Bank, Penn.) to John Quincy Adams on the suspension of Cash payments by the Banks. This and foancier, after shewing the position m which the United States, the United States Government, the deposit Banks, and the State banks respectively stand to each. other-after elucidating the effects which the proceedings of government produced on each in relation to the other-and after explaining how the present disastrous state of money matters might have been prevented, he proceeds :-

"In such a state of things, the first consitheir disapprobation of such intended marri deration is, how to escape from it-bow to age; and all persons solemnizing, assisting, or being present at any such prohibited mae-riage, shall incur the penalties of the statute of premunice." In the face of this enactment, the prince's marriage took place with sive connections, the established credit, the Mrs. Fuzherbert; as did that of the Dake of Sussex with Lady Augusta Marray subse-gaently at Rome. The occurrence created
