

The Pinnacle of Therapeutic Success can only be
attained by the Timely use of Proper Remedial Agents

Antiphlogistine

(Inflammation's
Antidote)

affords the most scientific method of combating Inflammation and Congestion. It is of especial benefit in the conditions incident to the summer season.

In ENTERO-COLITIS, and other Inflammations of the abdominal and pelvic viscera, Antiphlogistine proves a satisfactory adjuvant to treatment, as it produces a depletion of the enteric and peritoneal vessels, stimulates the reflexes and relieves the pain, tenesmus and muscular rigidity.

In SPRAINS and WRENCHES, the stretching or tearing of the ligaments, contusion of the synovial membrane and damage to vessels and nerves are best controlled by Antiphlogistine, which distinctly aids in the reconstruction of the part. The absorption of the liquid exudate from the swollen tissues and the free circulation of blood in the seat of the injury greatly hastens the process of repair.
