NURSES' HOME.

At a special meeting of the committee of management held Jan. 11th, the question of acquisition of a home for our nurses was discussed. Authority was given to a sub-committee to obtain memoranda of the most favorable terms on which the house adjoining the Maternity Annex could be obtained, with instructions to report, when the matter will be laid before the Governors for approval and sanction of purchase.

All the business connected with this matter must be closed before the first of February if we are to have the home this year. It therefore is incumbent on our friends to bestir themselves and send in subscriptions towards the fund for making the cash deposit required. Whatever you do, do quickly, as the larger the cash down payment the less will be our interest on the balance.

The total cost will be \$5,500 and it will probably require an additional \$500 to alter and fit up the premises to suit the requirements. In connection with this matter, we are reminded that this

year we celebrate our tenth anniversary, which should be celebrated in some fitting and lasting manner. The Nurses' Home offers just the occasion sought and might well be made the means of evoking substantial aid from some of our wealthier friends.

The opportunity to commemorate the anniversary and to establish a lasting memorial to the giver's name is here presented. If some of our patrons would donate the sum of say, \$3,000 towards this object, and have their name perpetuated by the "——" Nurses' Home. Don't miss this chance to get a full value return for your investment, as the time is rapidly approaching when connection with the Homœopathic Hospital of Montreal will be an enviable possession and a proof of comradeship with the good and great.

Of the necessity of obtaining more suitable quarters for our nurses nothing need be added to that already said. The humane side of the question appeals to all and the economical side has many supporters, as when nurses are sick their services are lost and the work interfered with. Much of this would be avoided by the acquisition of No. 48. Come and help us celebrate our "Tenth Anniversary," with a generous supply of that commodity, and attend to the matter as soon as you come to this part of the article.

J. K. Caird, a wealthy manufacturer of Dundee, Scotland, proposes to erect in that city a cancer hospital at a cost of \$90,000. He has also guaranteed the payment of \$5,000 a year for five years for original laboratory work in investigating the disease.
