

of Canada on collaboration in medical science and public health, drawn up in accordance with the General Agreement of Exchanges between the USSR and Canada of October 20, 1971.

Article II: Higher Education

1. The sides agreed:
  - a) to exchange annually on a reciprocal basis, up to 10 professors and specialists from each country, to do research in pure and applied sciences, medicine, agriculture, humanities and social sciences for a period of 4 months up to a total of 40 person-months;
  - b) to exchange young scientists who as a rule are under 35 to conduct research in the pure and applied sciences, medicine and agriculture, in the social sciences, the humanities and arts. Up to 10 persons will be exchanged annually from each side for a term of 10 months in each case.

Lists of exchange participants and their biographical forms for the next academic year are to be submitted to the host country by diplomatic channels not later than February 20. Representatives of the sides will
