- The handicapped and the elderly use videotex for news, information and emergency care services.
- Up-scale consumers choose videotex because it provides convenience and instant access to large volumes of up-to-the-minute information and services. It is inexpensive, easy to use, interactive and the information is available any time of the day.

Leading U.S. banks and financial institutions have chosen videotex as the ideal medium to expand their deposit base and establish a lucrative corner on the growing home banking, information and service market.
