pension funds have been added, and surpluses or deficits of Government enterprises are likewise included. In the federal accounts some of the more substantial adjustments are as follows: addition of national defence recoverable expenditure, allocation of war refunds to prior years, adjustment of corporate taxes to an accrual basis, elimination of sales of war assets to business, and elimination of British Commonwealth Air Training Plan write-off from expenditure. In addition the federal figures have been adjusted to a calendar year basis by using the monthly figures published by the Comptroller of the Treasury. Government loans to foreign countries or accumulation of gold or foreign exchange are not included with government expenditure.
