

the coal market, and by the superior quality of the coal of the six feet seam, these mines will soon acquire a great reputation.

CHARLES F. ESCHWEILLER.

NOTE IN REGARD TO THE QUALITY OF THE COAL

FROM THE NEW CAMPBELLTON MINES.

POMFRET Ct., 10th Sept., 1873.

* * * As respects the coal from the New Campbellton Mines, I recollect selling a cargo to Messrs. McLaughlin in Boston, Iron workers ; and another to Mr. S. G. Snelling, Treasurer of the Lowell Bleachery. Each of these gentlemen subsequently bought another cargo, which I considered sufficient proof of their good esteem of the coal.

I remember keeping a cargo for several months heaped on a wharf, to ascertain if there were any danger of spontaneous ignition. None took place, and I afterwards sold the coal.

C. J. HIGGINSON.
