Every Sufferer from Heart and
Nerve Troubles may have,
Free, a Full Box of Milburn's Heart and
Nerve Pills.

Here are some of the diseases and symptoms of disease for which these pills are indicated:—Palpitation and Fluttering of the Heart, Skip Beats, Weak and Irregular Pulse, Smothering and Sinking Spelis,

The Deer Trail Consolidated.
A meeting of the directors of the Deer Trail Consolidated Company was held on Saturday, when the President, Mr. J. D. Cheplin, was authorized to visit the properties, and went West on Saturday night; meantime, the question of paying a dividend was postponed, and a report will be Sent out to the shareholders this week.

Mitchell, Wallace & Co.'s Review.
Golden Star was active thruout the week, Considerable stock has changed hands.

toms of disease for which these pills are indicated:—Palpitation and Fluttering of the Heart, Skip Beats, Weak and Irregular Pulse, Smothering and Sinking Spells, Dizzhess and Faintness, Rush of Blood to the Head, Cold, Clammy Hands and Feet, Sensation of "Pins and Needles," Nervousness and Sieeplessness, Weakness and Tiredness, Brain Fag and Loss of Memory, Anaemia, Chlorosis or Green Sickness, Female Weakness, Debility of Growing Boys and Girls, Twembling of the Hands, Tobacco Heart, Partial Paralysis and lack of vital force.

We have such confidence in the curative qualities of Milburn's Heart and Nerve Pills that we will send a box free to any one suffering from any of the above complaints, provided they have never tried the pills before.

When sending for the pills write your ame and address plainly, mention this paper, and enclose a two-ct, stamp to cover gostage. The T. Milburn Co., Limited, Toronto, One

The Deer Trail Consolidated.

property. Our western correspondents have an expert knowledge of the Deer Trail property. They have bought large blocks of the stock during the late depression and express themselves as satisfied with the present appearance of the mines, and state that the stock is worth much more than its present price. Spokane brokers have been the principal buyers of Deer Trail for the past two weeks, and we think it wise to follow their lead. Fairview is neglected, pending the ratification of the deal made with English parties; the proposition will probably be accepted by the shareholders. Glant was active and in demand by western brokers. Hammond Reef was very weak in the early part of the week; a bear raid was made on this stock to no purpose. The stock is not plentiful and good reports from the mine would cause a sharp advance. Jim Blaine is cheap; this property may lie idle for a year or two or until such time as the management is relieved of more pressing dutles; the future history of this property, we think, will prove that a great opportunity is being overlooked in not buying some of this stock. King (Oro Denoro) is another stock that is selling at a low price in comparison to its prospects. Western brokers want Lone Pine, but, very little is coming out for sale. We learn from the west that Mountain Lion is making a success with the new mill; dividends are expected before the close of the year. North Star is lower and looks like a purchase. Payne is also lower and we believe will show a good advance within a month. Virtue took a decided drop, owing to disappointing mill returns. Ontarlo investors are not much concerned, as very little of this stock was placed here. We have carefully looked into the merits of Montreal-London and we are prepared to recommend this security as an excellent investment. We will be glad to give particulars of the recent deal made with responsible English people, the terms being very favorable to the shareholders of Montreal-London.

HEAD OFFICE: TORONTO, ONT.

The City Dairy Co., Limited, has been formed for the purpose of establishing a milk supply for citizens of Toronto and vicinity under thoroughly sanitary conditions. It is firmly believed that the Company will not only do a profitable business for its shareholders, but will, in addition, perform a distinct service to the city by placing the milk supply upon, perhaps, a better basis than the milk supply of any other city on the continent. During the past ten years sanitary science has made much progress in regulating some of the important supplies for human life, but it is well known that little general improvement has been made in the production and supply of milk. Milk, which, having regard to the health of children and invalids particularly, should be produced and delivered under the best conditions possible, is still, unfortunately, quite commonly a vehicle for the transmission of disease.

PRESENT CONDITIONS IN TORONTO.

The milk supply of Toronto is in all probability not behind that of most other cities, but the conditions surrounding milk production, collection, storage and distribution in any city where special organizations with modern sanitary appliances have not been introduced are such as could not be approved by those taking the trouble to investigate for themselves the general conditions surrounding the industry. The conditions of barns, milk houses, transportation of milk and its handling and delivery in the city are practically unregulated. It is safe to say that only a portion of the farms supplying to the city have ever been visited by the Board of Health inspectors. This is no reflection on the Medical Health Officer, who is thoroughly alive to the importance of the subject, but is due to limitations of authority and of appropriations of the Board, and especially to the fact that betterment is next to impossible upon the present commercial basis.

There are at present something over 300 milk dealers in Toronto, delivering an average of about 5 cans a day each, requiring about 750 wagons for the purpose, whereas less than one-fourth the number of wagons would accomplish the delivery under a proper system.

The milk, for the most part, is delivered from the cans by dipping it into various utensils in the streets.

Where the bottle system is used, the bottles are filled in the rooms of stores and private homes not at all suited for the purpose, and sometimes in the wagons on the streets. The bottles are not always properly cleansed, as there are only two or three dealers in the city having steri-

No article of food is more susceptible to injury from its surroundings than milk, and none so quickly absorbs and develops bacteria on exposure, and instead of milk being left to careless handling, of all commodities, its distribution should be attended with the greatest care.

A NEW SYSTEM NECESSARY.

It has been repeatedly stated by leading physicians of the city that no greater benefit could be conferred upon Toronto than the placing of its milk supply upon a really proper basis. This can only be accomplished by a company with sufficient capital expending the necessary sum for thorough inspection of the cattle producing the milk and of their surroundings, and the equipment of a large central plant with efficient scientific apparatus for aerating, cooling, bottling and caring for the milk as received and sent out.

This involves a large investment and an extensive sanitary building, with cold storage plant and with all facilities for washing, sterilizing and filling bottles expeditiously under most rigid rules as to cleanliness. These premises should be under the constant supervision of the Health Officer's department, and open to public inspection

The company undertaking this work must, of necessity, buy its milk direct from farms, and every producer must be required to sign a strict contract setting out in detail the requisites of the company in regard to sanitary surroundings, feeding, watering, general care of the cattle, and mode of caring for milk until delivered to the company, all of which will be subject to regular inspection by veterinarians and special officers of the company.

CITY DAIRY COMPANY, LIMITED.

With the express object of carrying out the plan indicated above, the City Dairy Company, Limited, has been organized with ample capital. Its directors, who have carefully looked into the matter, believe that with the latest and most modern facilities and proper system—even though it will, probably, be found expedient to pay somewhat higher prices to the producer, to secure a better quality of milk, without advancing prices to the retail customer-there is a sufficient margin to make a successful business.

It is not the purpose of this company to force or even urge a consolidation of all the milk routes. It will undoubtedly, however, do a large proportion of the milk and cream business of Toronto. With the routes already secured and under option there is every reason to expect that when the company's new premises are completed it will start off with a daily business of at least 750 cans of milk; 250 wholesale and 500 cans or 16,000 quarts delivered daily to retail customers. At the dairy, which will be centrally located, the milk as received will be at once inspected and tests made

as to its fat content and purity. A chemist and bacteriologist will be retained on the company's staff, whose regular examination of every can

received will insure its cleanliness and purity. After inspection the milk will be elevated to filters and clarifiers, whence it will pass into the antiseptic milk

room, where, by gravitation, it will fall over aerators and coolers to the bottling tables. After filling, the bottles will be sealed and placed in cold storage rooms until taken out and delivered to

The Company will also do a large business in definite percentage and table cream. Other dairy products will also be handled, and a thoroughly modern ice cream plant will be installed. The ice cream business of the Company will be quite important, as is evidenced by the profitable ice cream businesses in many cities in the United

All departments of the Company's business will be on a sufficiently extensive scale to warrant placing each The stables will be thoroughly equipped for the care of the horses and vehicles in the best and most economical manner. The rolling stock will be the best adapted to the purpose. of them in charge of an expert.

Cleanly and courteous drivers in uniform will attend to the delivery.

The Company will do only a cash business on an approved ticket system. The attention of the citizens of Toronto is cordially invited to the methods to be adopted by the

City Dairy Co., Limited, and on the completion of its plant all will be welcome to inspect the operations of the Company from start to finish. J. L. SPINK, Managing Director. J. V. Moore, Superintendent.

A CO-OPERATIVE COMPANY.

The nature of the business is such that the founders of the Company consider it should be largely co-operative. Accordingly, in the organization, instead of large blocks of common stock being appropriated for a few promoters, it has been arranged that there shall be a wide partnership, with all shareholders on more nearly equal terms. With this in view the undersigned have been placed in a position by which they are able to provide a bonus of one share common stock with each share of preference stock. In this way the \$350,000 of preference stock will carry \$350,000 common stock as bonus. Of the \$350,000 of preference stock, \$80,000 has been subscribed by the directors; \$70,000 is being applied

in part payment of purchase price to milk dealers selling out to the company; \$100,000 remains in the treasury, and the public are now given the opportunity to subscribe for \$100,000 (1,000 shares of \$100.00 each) in small amounts. carrying a bonus of one share common stock (fully paid and ron-assessable) for each share of preference stock. NET PROFITS.

A very careful and exhaustive estimate made by the President, Managing Director and Superintendent, with other directors, assisted by Mr. S. M. Heulings of Philadelphia, widely known as an expert in this direction, indicates that net profits for the first full year of operation, after providing for every possible expense, may be expected to reach, at least, \$51,300, a sum sufficient to puy 7% on the \$250,000 preferred stock outstanding and 5% on the \$500,000 of outstanding common stock and leave a reasonable balance at credit of profit and loss account. This sum should be capable of steady increase as the Company's field of operation enlarges. All of the money realized under subscriptions for preference stock will be devoted absolutely, without deduc-

tion, to the actual business of the Company. There will be no costs whatever for advertising, flotation or prelimin ary expenses payable out of money realized from preference stock.

SUBSCRIPTION BOOKS will be opened at the offices of the undersigned on Tuesday Morning, the 12th inst., at ten o'clock, and close not later than 4 o'clock on Monday, the 18th inst. Subscriptions will be received for one share and upwards, and in allotment preference will be given to small subscribers who are bona fide residents of Toronto or suburbs of Toronto and farmers

The right is reserved to close the subscription books at any time before 4 o'clock on the 18th inst., to allot in whole or in part of application and to reject any application.

1000 Preference Shares at Par. - \$100,000 Carrying as bonus, share for share,

1000 Common Shares of \$100 Each. The 7% preference stock carries quarterly cumulative dividends, has priority over the common stock as toboth dividends and assets, and is payable 10% on allotment, 10% on the first day of each of July, August, September and October, 1900, and 50% on June 1st, 1901, with the privilege of making prepayment of any or all instalments at any instalment date. Subscription forms may be had on application.
