In presenting our report this year we have to note with thankfulness an increased attendance at the meetings, and with that a greater interest in the work done.

Our meetings have been held regularly on the first Fridays in the month. We regret that the young ladies of the Congregation have not, so far, taken an interest in the work, but trust that the coming year may see an improvement in that direction. At our monthly meetings, besides the regular routine business, several very interesting letters and papers from the different Mission fields have been read, as well as reports from Madame Coté, the French Bible woman, and Miss McSween, the nurse of the Society.

Early in the year it was felt that during the summer, the ladies might continue their work by sewing for a Missionary's family.
