certain that all talk about a special line of 25 knots steamers is out of the question. I have every reason to believe that before the present English government goes to the country there will be a steamship and railroad route around the empire, subsidized in fair ratio by England, Australia, New Zealand and Canada, and possibly by South Africa. The existing lines will be used for this purpose, with probably an addition of some 18 knot steamers. England's Great Fight.

England's Great Fight.

"England is the richest country in the world, and the proof of this is that every other country in the world borrows from England. In my opinion England's fiscal policy is all right, but she suffers, and suffers grievously, from two afflictions, namely, beer and bigotry, and the beer lord and the state church parson work hand in glove against the present government that is fighting, and will fight, to put the well-being of the nation as a whole above the miserable interests of an unscrupulous trade and a privileged church. the miserable interests of an inscruptious trade and a privileged church. In short, the battle waged and to be waged by Mr. Asquith and the millions who support him, is a battle against the monopoly and degenerating power of the drink traffic, against the idea of a state church that attempts to ostracise here and damn hereafter those who disagree with it, and against the still stronger vestiges of feudalism the still stronger vestiges of feudalism in the matter of large estates for the few and no land for the million."

"ROLLICKERS" TAKE WELL. Big Crowds Continue to Enjoy the Per-formance at the Star.

The favor which the "Rollickers" have met in Toronto was indicatat the Star. The show defies the usual custom of opening and closing with a burlesque, with an ollo as a connecting link, and, instead, gives something like continuous action, altho the plot is not too complicated and would not be mistaken for the work of Ibsen or Pinero. Will H. Cohan and Lem Welch are the two chief comedians, and the reckless abandon with which they plunge in Wall-st. makes, Tom Lawson look like a conservative investor in first mortgages. The System vestor in first mortgages. The System has evidently determined to crush the

pair, judging by results. There are a number of clever people the cast, besides Messrs. Cohan and Welch, who have a fine line of stage Yiddish. Violet Pearl's voice isn't given to bird-like thrill, but it isn't given to bird-like thrill, but it is of musical quality and resonant enough to dominate the choruses, which are excellently sung by a fetching pony ballet, which averages high in looks and has been dealt generously with by the management in the number and attractiveness of the gowns. Daisy d'Cuesta has learned the technique of toe-dancing very thoroly and Alf Hall successfully revives the clog dance. Hazel Sanger vives the clog dance. Hazel Sanger shows a good quality of soprano in popular songs. All who are pleased with bright, clean burlesque should visit the Star this week.

Last Day to Return to Work as Break the Ranks.

Not a man of the 10,000 striking C. P. R. mechanics responded to the invitation issued by the company to go back to work.

Old men, close to the time of pensioning off, 65 years, say emphatically that they would much rather sacrifice the \$200 a year or more in prospect than go back to work under the conditions laid down by the company.

From the far west and the east, the strikers have information that the company has not men at work, and that the big bulk of the strike breakers are at the Toronto terminals, and these men are being taken out by the pickets as fast, if not faster, than the company is running them in.

To cap all this, as tho the cup of woe were not full, a grievance committee of the locomotive engineers waited on Master Mechanic Preston at West Toronto yesterday and complained of the state of the engines were in, adding that they couldn't make anything like good time with them.

It is rumored also that the Brotherhood of Firemen are thinking of taking action soon if something is not done. They object to doing the work of car inspectors.
