Headaches from eye strain. Few people realize how large is the proportion of headaches directly due to strained eyes.

This is nature's danger signal. Unless the strain is relieved, serious permanent injury to the eyes will result. Children frequently suffer from eye-strain without knowing the cause of it.

If your child has headaches find out the cause. If you suspect it comes from eye-strain have us examine the child's eyes at once. Under no circumstances allow your child to continue school work with strained eyes. Not only will the eyes be injured but the whole nervous system will be affected by the strain. Come early in the morning for the best results in eye examinations.
