

WINDSOR, June 29th, 1871.

Venerable and Dear Sir,—

With reference to your letter addressed to Professor Hind regarding the proposed division of the "Williams Prize," we regret to state that in the event of this step being required by the Board of Governors, "we should not consider ourselves justified in recommending any prize to be given, the competitors having attained but little over *one fifth* of the number of marks complete answers to the questions would have secured."

We have the honour to be,

Your obedient servants,

HENRY Y. HIND,

R. S. FRECHVILLE

The Venerable Archdeacon McCawley,
President of King's College.

HALIFAX, 26th June, 1871.

The Venerable the President of King's College, Windsor.

SIR,—I beg to report herewith the result of the examination held this day for the General Williams Prize in Engineering, for which there were two competitors.

The aggregate number of marks attainable was 1000, equally divided between two papers, of which Mr. Dodwell secured 425 for his first and 80 for the second; for Mr. Hind's first paper 200 marks were obtained, and for the second no competition was made owing to indisposition.

Basing my decision upon the merits of the replies to the questions contained in the first paper—the only one for which both parties competed—the award is made in favour of Mr. Dodwell, for the general style and scope of whose answers credit is due, while Mr. Hind is also deserving of praise for the satisfactory manner in which he dealt with several questions, he having, as I am informed commenced the study of Engineering quite recently.

Yours faithfully,

ALEX. McNAB
