

And although two years seems a long time to be away from my family still I am perfectly happy & more content as the days advance.

There is such a comfort in the mere fact of knowing that soon I will leave a profession of my own & be independent & perhaps of some little use to humanity which lies near my heart -

I was fortunate enough to be the last one to sign the last paper for the two year course -

Three years would seem unbearable -

I don't know why I am writing you all this but somehow I feel you still would be interested to know & your letter was so very kind -

I thank you for your kind wishes & hope you too will be successful in all your undertakings as you always have been

Yours sincerely
