

KILGOUR BROS.

SOLE MANUFACTURERS OF THE NEW

SELF-OPENING SQUARE PAPER BAG,

Which is now, for the first time, given to the public after eight years of the most assiduous and expensive experimenting to perfect the machinery on which it is made.

It is the first really Square and Flat Bottom Bag ever produced by machinery, although square bags so-called have been heretofore made.

For a machine to do what is necessary, to crease, fold and paste paper into the form required, to make what in fact is a collapsed box, is a wonderful achievement, which has been hitherto considered impossible.

ITS SUPERIORITY OVER ALL OTHER BAGS CONSISTS:

FIRST—In the fact that it is SELF-OPENING. The grocer merely has to grasp one side of the opening and give it a flip through the air as he lifts it from his counter or rack, and it at once becomes a perfectly square box, which will stand upon its bottom. It requires no manipulation inside, which is necessary with all other bags in order to bring them to shape, at a great loss of the grocer's valuable time.

SECOND—In the better shape of a bundle of the bags, and in a saving of room on the grocer's counter or shelf thereby.

THIRD—In the shape and symmetry of the package when filled.

FOURTH—The bag, having no folds or loose pockets inside or outside its bottom, will empty out clean, and not a particle of material is wasted or carried away in the outside fold to be spilled over the floor.

In short, the bag speaks for itself, and a trial will convince anyone that it is the most perfect bag ever produced.

The Machinery by which these Bags are made is covered by a number of recent valuable Patents, which will be protected at all hazards.
