"Frost" Fence

We Make Our Own Wire So We Can Warrant Quality

You can be absolutely sure of utmost value when you pay the moderate price you are asked for Frost Fence. For we produce every part of it from raw materials right here in our own factory. We see to it that it is RIGHT in every detail before it leaves here. We make sure it is a good fence, made of good materials, woven at only average speed, on improved machines, by skilled men. We strive less for big production than for solid quality, careful methods, and full measure of value to every inch of fence we sell.

Don't Bother with Cheap Fences

You will never be satisfied with fence that has only its price to commend it. You will be suited with Frost Fence, which sells for a fair price, and whose buyers come back for more whenever they want more fencing. Frost Fence STAYS good, year in, year out. That's because it is made good to make good.

Address :

Frost Fence is the first woven fence in which the horizontal wires have as much provision for give and take as though coiled wire were used. Thus Frost Fence stays springy and taut, and does not grow slack. And Frost Fence Locks are never loose, and never slacken their grip

Every stay in Frost Fence is made from hard steel wire, just the same as is used for the horizontals. This stiff, springy material makes Frost Fence much firmer. The stays are spaced exactly the same distance; none is ever missing; and every one is rigidly perpendicular when the fence is stretched. When stretching, just see that the first stay, at the starting post, is straight, and you can be certain all the others in the row will be the same. Every horizontal is of the same length, so that Frost Fence is easy to stretch—and it STAYS taut and firm for keeps.

Frost Fence Doesn't Grow Slack

That simple but powerful binding on Frost Fence holds the stays straight, and doesn't kink nor weaken the horizontal wires. Improved machines make it impossible for a lock to be missing in the weaving process, or for a lock to be loose. In every particular, and at every point, Frost Fence is worth your money, and will surely give you the kind of fence service you want to buy.

There's a Frost Fence for every purpose. The Catalogue Describes them all.
