THE

The death claims amounted to less than two-thirds of the Income from Interest, Rents, etc. This is another demonstration of the careful selection of lives made by this Company.

Without taking into account the profits on sale of securities, the Interest Rate on the Mean Ledger Assets amounted to 5.73 per cent.

In view of the great care taken in investing the Company's funds, this rate must be extremely gratifying to everyone interested in the Company.

Mrs. A. Carr and Silas Cornish, of Aylwin, Que., who pleaded guilty to setting fire to two buildings there on May 10, have been sentenced by Judge Goyette at Hull to ten months' imprisonment. The case arose out of spite, Mrs. Carr employing Cornish to fire the buildings.

As an evidence of the growth of Regina, the city's work will in future be managed by a commission of three under the council. Twenty five years ago Saskatchewan was regarded as suitable only for the pursuits of the fur trade and the struggling pioneer with crude agricultural methods. The last authentic figures record the total value of agricultural produce of the province for 1909 at over \$150,000,000.

The Imperial Life Assurance Company has lost no time in circulating forms to be attached by their agents to applications for insurance. The sections of the Insurance Act relating to rebating and discrimination, are printed on the back of the form, under which the agents sign a statement that they have not violated and will not violate these particular sections. The insurance companies and the majority of insurance agents are strongly opposed to rebating.

Seven to One

That is about the ratio. About seven times as many persons are injured as die from all causes yearly. Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidentally killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?
