It is claimed, and very justly too, that if any part of this duty is taken away, the whole must be abandoned, because the greater part of the lumber will come down as American lumber, and to endeavor to separate it would give rise to all kinds of frauds, and be the source of endless trouble and confusion. To compensate New Brunswick for what she is losing, would require more than the amount necessary to yield this sum yearly, because the revenue from this source is likely to go on increasing for years to come, as our trade expands. But suppose we estimate it at the present yearly revenue, it would require a capital sum of \$1,050,000, at 6 per cent., to compensate for what we lose. Of course the Imperial Government will provide that this amount be paid over to our Government either in the lump sum, or yearly, if New Brunswick, stands upon her rights, and surrenders all her export duty or none.

The resolutions which the Government will introduce will, it is hoped, give a full opportufied stand, and express, in unmistakable lan-guage, to the members of the Canadian Govent the sense of our Province at least upon the question, and the course their regard for the well-being of an integral portion of the Dominion should induce them to pursue. think it may be uselss to take any action, as the matter is altogether under the control of the Parliament at Ottawa. But the majority feel differently. They feel that the voice of justice can be made to be heard even there, and that if New Brunswick through her representatives beaks out, she can make her influence felt.

PROGRESS OF THE NORTHERN PACIFIC RAIL-AD.-The energy with which the building of this great thoroughfare is being pushed forward is an added guaranty of its early completion and its wise management. We learn from the financial agents of the Road, Messrs. Jay Cooke & Co., that, at the present date, the grading is nearly finished for 266 miles, from Lake Superior, through Central Minnesota, to the eastern border of Dakota; trains are running over 130 miles of completed track; the Mississippi river is bridged at Brainerd and once more joined to the Lakes by rail, and track-laying is rapidly progressing westward. By September next, trains will run to the Red river, and the grading will probably be far advanced toward the Great nd of the Missouri river in Central Dakota. In the meantime work has been commenced the present season on the Pacific coast; a large force of men is already employed in the valley of the Columbia river, in Washington Territory, and hereafter the work of construction will pushed both eastward and westward toward

the centre with such rapidity as the best interests of the Road may justify.

Including its purchase of the St. Paul and Pacific Road, the Northern Pacific Railroad Company has 413 Miles of Road now in operation, and before the close of the present season the length of finished track will be at least 560 miles. The new highway to the Pacific is being constructed at the lowest cost compatible with
