This cut shows an up-to-date Barn Construction, 40 feet x 70 feet, and the method of covering with Corrugated Sheets. The framework is light, as the corrugated sheets, when nailed in place, make the building very rigid. This drawing is made from actual plans and the barn has been built many times with splendid results.

The saving of wood sheeting, as compared with the ordinary construction, will cover the difference in cost between wood shingles and our "Acorn Quality" Corrugated Galvanized sheets.

This galvanized covering protects your building from fire, prevents fires from the outside, is easily and cheaply applied. OUTLASTS A GENERATION.

Do not make a mistake and put up an old style barn, when you can secure a better and more durable construction for less money.

See the page of barn illustrations in our new catalogue, and for our book of testimonials with list of users.
