

# WILL FIGHT AGAINST CITY.

## Connecting of Filtering Basins Will be Bitterly Opposed.

### Board of Health Will Not Object to Proposed Site.

### Board of Education Will Continue Manual Training.

The city's hope that everything would be smooth sailing in getting permission to scoop out the road between the two filtering basins is not by any means justified. The Beach Commissioners have received a letter from S. D. Biggar, solicitor for Mr. Fitch, proprietor of the Beach Road Hotel, saying his property and business will be seriously injured if the road is destroyed. Saltfleet township Council will also object and the Commissioners have promised to hear its side of it. The Commissioners hope to be in a position to give the city an answer next week.

The Special Committee of the Board of Education appointed last evening to consider the question of continuing manual training at the Collegiate Institute, decided last night to continue the class for the present year under W. Bailey, who has been in the employ of the Government as an instructor in manual training. His salary will be \$100 a month. The trustees thought the system of training was too much theoretical and not practical enough. The committee of "Friends of the Whitney Government," appointed to see what the Government was going to do about establishing the technical school here, as promised when the Normal College was removed to Toronto, will wait on the Government shortly.

The Board of Works has a lot of important business to deal with on Tuesday. A petition, with nearly a hundred signatures, has been filed, protesting against the Radial diverting its line at Cannon street and Madison avenue on private right of way. The property holders say many fine houses will be destroyed and others injured. A deputation will be on hand to back up the protest. A number of letters have also been received, objecting to the route.

It will be impossible to do anything further next week with the lighting tenders, as the expert from the Hydro-Power-Commission, who was to have come here, has not shown up yet.

A good many people are wondering why Sir John's monument has not been removed from John and King streets to the Gore extension, as decided upon by the Council. The delay has been caused because Thomas Fanning, who has the contract, wants another \$50 of Sir John's to face east. The matter will be settled next week.

Dr. Roberts, Medical Health Officer, declared to-day that he did not think there would be the slightest opposition on the part of the Board of Health to the Southern Home for Consumptives going on the Hospital grounds, now that it was known that it could not be built on the Sanitarium grounds.

The value of building permits issued during August of this year shows a decrease of \$24,305 as compared with August of last year. This is accounted for by the fact that in August last year the permits for the drill hall, a \$250,000 job, and a block of forty houses to cost \$75,000, were issued. The figures were: August, 1906, \$444,869, and for this month \$120,555.

Permits were issued to-day to William Martin for a brick house on Fairview avenue, between Main and Delaware avenue, to cost \$1,800, and to Mr. Levy for a frame warehouse building at the corner of Caroline and Barton streets, to cost \$1,000.

The health report for the week shows two cases of diphtheria, and one each of German measles and scarlet fever.

## H. G. & B. STOCK.

### Efforts Being Made to Purchase Minority Holdings.

It is reported that the Cataract Power Company, holders of a majority of the shares of the H. G. & B. Co., are negotiating with the minority stockholders to have their H. G. & B. stock exchanged for preferred stock in the new Dominion Power & Transmission Co. All the minority stock was pooled long before the suit was started against the controlling directors, which resulted in a victory for the minority. As the H. G. & B. stock has paid no dividends since the new directors came into power, some of the smaller stockholders are willing to accept the dividend-paying stock for their holdings. The trustees do not favor the proposition, and are anxious to hold out for a cash deal.

### A Treat Given to the Boys' Home Boys.

Last Monday afternoon the boys of the Boys' Home were entertained by Mrs. Thomas W. Watkins and her little grandson, Master Reginald, at Dundurn Park. Cars were provided at the head of Wentworth street at 2 p. m., and the boys were taken to the grounds. After enjoying a round of games tea was served on the lawn, after which the boys were taken back to the Home by street car.

### DR. HARRIS' STUDIO.

Dr. C. L. M. Harris has resumed his music classes and has opened a studio at his residence, 208 Jackson street west. He has issued a circular giving the full information concerning the work done by him during his residence in Hamilton, which covers a period of twenty years. The contents of the circular will be a surprise, as it contains the names of many of Hamilton's successful musicians who have studied under Dr. Harris, and also a list of the graduates in music who have been coached for their examination exclusively by him.

The Times will not be published on Monday. It being Labor Day, the employees will cease from labor on that day. Look out for our new story next week, it's a rattling good one.

### The Progress of Science and Art.

It is only occasionally that the ordinary citizen is brought face to face with a realization of the advancement of science and art, and the fact that already in the 20th century, young as it is, wonderful strides are being made. At the Toronto Industrial Exhibition this year there are really many monuments to the progress of industry, science and art, and perhaps more than anywhere else is this apparent in the exhibit of pianos in the Manufacturers' building. Here, for instance, at the exhibit of New Scale Williams pianos, one may see instruments of superbly artistic design embodying art of a high quality that pleases every sense of beauty and at the same time are monuments to science, because of their perfect tonal qualities. The success of the New Scale Williams is the result of study, industry and ability, applied by skillful workmen to the manufacture of a piano that should excel, and visitors to the Exhibition will be well repaid by viewing the exhibit of New Scale Williams pianos in the Manufacturers' building. The Louis XV. grand piano, one of Africa's mahogany from the Gold Coast, daintily hand carved, is the feature of the exhibit.

This concern has made a specialty of choice individual designs to meet the taste of the individual. A special art product exhibition in George W. Carey's warehouses, King street west.
