ance of the nineteenth volume of the admirable Alden's Manifold Cyclopedia.

It was apparent from the first that this

was to be the Cyclopedia for "the peo-

ple," and each succeeding volume em-

phasizes the great superiority of the work

work for popular use over its more costly

competitors. It is remarkably compre-hensive. The fields of literature, science,

art, and of all knowledge are thoroughly

gleaned. The topics are ably treated, many illustrations are given, and a vast

amount of information is condensed into small space. The articles are written by

experts in their various lines, and are carefully and skilfully edited. The re-

sults of the latest discoveries and inven-

tions appear, many of the subjects being brought down to June, 1889, and

some even later. Among the important topics treated in this volume we notice Home Rule in Ireland; Homestead En-

try, and the Homestead Laws for all the

States; Homeopathy, nearly 7 pages; Hop; Horology; Horse, Horse Racing, Horse Shoeing, and Horse Taming; Hos-

pitals, 8 pages; Howard University; Hy-

valuable statistics; Imports and Exports, with figures for the United States cover-

ing 100 years, and brought down to June, 1889; Indians, 7 pages; Induction of Electric Currents, 8 pages. In the line of biography we find articles on Homer;

It seems that Mr Thos. Durnin, who has been looking for a place some time, to locate himself and family, has come to the conclusion that Dungannon is the best place to reside in, as he has purchased the property of Jos. Smith, carpenter, formerly a resident of this locality and village for many years, but now of Chicago, U. S., for the sum of \$1400.
