Apart from the counterfeit, containing the figure 20 on the left side, and the figure 20 on the right side, there is a photograph of the obverse of the certificate. The seal is small and aclopped, having a reddish tinge, apparently applied with a brush. The number is very pronounced and in the center of the certificate. The surface of the note is embossed, and one-eighth of an inch narrower than the genuine, but it has the two parallel silk threads running through it. The tint on the back of the note is light brown, while the genuine note is in orange. The duty counterfeiter is determined by the character of its initials rather than by the lines in the engraving, as it is a photograph of genuine work.

Senior Vienna's Opinion.

PARIS, Nov. 20.—Senior Claudio Vienna, who was selected by Balmaceda to succeed him in the presidency of Chile, is here. Regarding the affairs in Chile he refused to talk until the public mind there became tranquil and the political situation normal. He said that when the proper time came he would give the Chilean revolution a history containing facts, and also what he had pronounced a verdict as to the part he played in Balmaceda's Government. Referring to the general situation in South America he said that the Chilean revolution had had an unsettling influence on the whole continent, and a general conflagration was liable to break out at any moment. Brazil, since the proclamation of the Republic, has been unable to establish a government having the essential elements of permanence. The divergent interests, political and economic, and the dissimilar sympathies, customs and temperaments of the inhabitants would inevitably lead to a separation of the country into at least two sections—north and south. In Argentine serious changes are taking place, and there is a general outbreak of discontent impending. Even now there are indications of movements of a disquieting nature observable by the student of politics.

The Market Glutted.

New factories and old ones will hold a meeting at Swansea, next week, to consider the situation. A proposition will be made to stop work in all the factories for a month, and reduce the output to half the present quantity.

False Frenzy.

MONTEVIDEO, Nov. 20.—There is an indefinite report of an attempt on the part of Fonseca's forces to land near Barboza, a small port in the North Rio Grande do Sul, not far distant by land from Port D'Algo. Fonseca's vessels did not show any shells, or attempt to injure Barboza, keep up a friendly fire, in pretense of friendship, to which the people on shore did not respond in similar spirit. The junta sent an additional force, yesterday, to Rio Grande do Sul, that place being the key to the situation from a defensive point of view.
