DEEM PICTURE OUT OF PLACE

British Authorities Request Removal Kaiser's Portrait From Tonga King's Palace.

Germany's interesting relations with the little kingdom of Tonga in the South Pacific are recalled by recent incidents there. A few years back a life-size portrait of the kaiser mounted within a massive gilt frame was presented by the German government to King George Tuboa II, the present ruler of the archipelago. Forthwith this picture adorned the walls of the wooden palace at Nukualofa, the capital of the kingdom. Germans-who, shortly before the war, were rather conspicuous in Tonga—were wont to admire the painting when they came to pay their respects to King George. Moreover. Mose at hand were busts of Emperor Frederick of Germany and Prince von Bismarck. So delightfully informal in many ways is the Tongan court that the busts did excellent service as hat racks on festive occasions. But not so with the present from the "All Highest." But alack for the big picture of the kaiser in little Tonga! After the war had been in progress for some time the fact of its existence and whereshouts came within the purview of the British government and that government requested the Tongan government to remove it from the palace. The pith of this request was that Tonga is a British protectorate. But not-withstanding Tonga is a British protectorate it is the last independent kingdom in the Pacific and it prides itself on having not only a monarch but a cabinet and a parliament.—New York World.

HISTORY WROUGHT IN STONE

Marvels of French Architecture Which the Uncivilized Hordes of Germany Would Destroy.

In architecture France is supreme. It well may be said that without France there would have been no Gothic architecture. The cathedrals of France are absolutely unrivaled, says Cass Gilbert in the World's Work. One has only to mention the names of Notre Dame de Paris, Bourges, Reins, Chartres, Reuen, Amiens, Beauvais and Coutances to bring up memories of miracles of creative design which no words can fittingly characterize or describe.

Wonders of constructive ingenuity as they are, they have a yet more supreme significance as evidence of the refinement and taste of a people in-stinct with emotion and ennobled by idealism in its most exalted phase These great buildings give expression to the spiritual aspirations of a great

people. They are constructions of superb scale and fascinating beauty, embellished by tracery and arabesque, carvinlay, stained glass, tanestry bronze and iron of marvelous crafts manship and exquisite design. They are the product of a thousand years of faultless taste, the contribution of innumerable thousands of craftsmen devoted to the glory of God and the love of France. And it is this glorious nation that the hordes of Germany would destroy.

Within Sound of the Guns.

A new sound arose in the darkness, a sound which held for me a thrill as vital and incomparably more alluring than the hint of distant battle. It rose slowly, a rich, mellow undulation, which stirred every fiber, and then quavered, descended and broke off. We stood motionless, listening with all our ears, and again it came, unmistakably, from the depths of the misty woods.
My companion smiled at me in triumph. His first surprise had come off promptly, even ahead of time, for it was only now growing dusk. We could see in imagination the drooped tail, the hollow-cheeked muzzle raised skyward -a wolf uttering that cry which of all sounds is most symbolic of the northern wilderness; un hurlement plaintif et lugubre. I could not believe my ears, that here in the heart of France, within sound of the guns at the front, I had heard the voice of a wild wolf. William Beebe in Atlantic.

From a French inventor comes an advertising sign in which an opera hat is its housing. The sides of the hat are cut so that letters are removed that spell out the words of the sign. These letter holes are covered over with a thin light fabric of the same color as the hat. When unlighted the letters remain invisible, but with one or more battery lamps placed inside and lighted, the hat becomes a conspic-uous advertisement. The batteries may be carried in the pocket and wired under the coat to the neck and up to the hat over the hair on the back of the head. The current can be flashed on and off with a switch in the coat pocket. This is a real novelty in ad-vertising signs and one which would be sure to attract attention,-Popular Science Monthly.

To Avoid and Relieve Influenza

BY DR. PRANKLIN DUANE.

Many people have been frightened by what they have read or heard of influenza. The more you fear the disease, the surezyou are to get it. Go right about your business and forget it. As the disease is spread principally by contact thru sneering, coughing or spitting, many health authorities have advised that everyone wear a gauze, which is daily washed and saturated with a one to five hundred solution of zinc sulphate in water, and then dried before wearing over the nose and mouth. You should avoid crowds, common drinking cups and public towels. Keep your strength up by taking lots of exercise in the open air and plenty of nourishing food. If you have any of such symptoms as chilliness, nasal obstructions, flushed face, headache, feverishness, restlessness, weakness, or irritating cough, give up work at once and go to bed. This will save your strength to help overcome the disease. Put your feet in hot water for fifteen minutes. Thoroughly loosen the bowels with some such mild and non-irritating physic as Dr. Pierce's Pleasant Pellets. Drink principally of hot lemonade and then cover up with plenty of clothes in bed so as to got a good sweat. When sweating is free and the fever reduced take a dose of two Anuric Tablets every four hours, followed by drinking at least a glass or two of hot water. Anuric Tablets help quickly to relieve the soreness of the muscles and bones from which most patients complain and help the kidneys flush out the poisons. To relieve nasal obstructions and excessive discharge from the nose, probably nothing is better than such a mild, soothing, antiseptic wash as Dr. Sage's Catarri Remedy. It will give great relief. Employed as a gargle, in same strength as made up for use in the nose, and as hot as can be borne, it quickly arrests soreness and dryness in the throat. Influenza weakens the patient's resistance to disease, so that there is danger of bronchirts and pneumonia developing. To combat this tendency and fortify the patient's resistance to disease, so that th BY DR. FRANKLIN DUANE.
