"Here Comes The Bride!"

Everybody wishes her well! Happy and radiant she starts out on life's adventure. She should have health to begin with. Good looks in woman do not depend upon age, but upon health. You never see a good-looking woman who is weak, run-down, irritable, out of sorts, fidgety and nervous. Headaches, backaches, and troubles of that sort are all destroyers of beauty. Men do not admire sickness. It is within the reach of every woman to be well, healthy and strong if she will take Dr. Pierce's Favorite Prescription.

Toronto, Ont.—"Less than a year ago I was in a very poor state of health; my back ached dreadfully and I could scarcely drag myself around to do my housework. I started to take Dr. Pierce's Favorite Prescription and I cannot praise it too highly for the great benefit I received. My back-ache and pains disappeared entirely and I soon was restored to perfect health. I know that Doctor Pierce's Favorite Prescription is the best woman's medicine, for I have tried others that were recommended, and nothing has ever helped me so much as the Favorite Prescription."—Mrs. KATHLEEN WHILLANS, 13 Brookfield St.
Send 10 cents to Doctor Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial package of Favorite Prescription Tablets.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

CANADA'S EXPORTS OF BACON

Dominion to Offer Prizes for the Encouragement of Boys' and Girls' Pig Clubs.
During recent years, and particularly during the war period Canada's expert bacon trade developed very rapidly. This is proven by the fact that last year exports of bacon from the Dominion amounted in value to \$34,000,000 and that our killings of hogs in eight years doubled in number, while those of Denmark and Ireland decreased considerably. With the return to normal conditions, vigorous efforts will have to be made in order to maintain this position. The Live Stock Branch of the Dominion Department of Agriculture has entered upon a special campaign to stimulate the production of hogs of the bacon type. In co-operation with the provincial departments, an arrangement has been made to offer attractive prizes to members of boys' and girls' pig clubs who exhibit at local fairs, both for quality of product and ability in judging. Where such clubs do not exist, attempts at organization will be made. The idea is not only to stimulate and sustain production, but to circulate knowledge of actual market requirements and thus to create a standard type of bacon hog for the entire Dominion. When it is stated that the British market imports annually 500,000,000 pounds of bacon, understanding is possible of the value of the trade that is at stake. It is hardly necessary to suggest that the hearty co-operation of farmers and everyone interested is hoped for. Rules and regulations governing the competition may be obtained from the Dominion Live Stock Commissioner at Ottawa.

The Cow a Food Laboratory
How can we build a new breed of men without we start with the babies? It is impossible to improve our race unless we nourish our infants that they may develop both physically and mentally.
The dairy cow is at the foundation of every industry. She is a most wonderful laboratory. She fills her stomach hopper with grain, grass and silage, then she lies down and by chewing her cud, converts this raw material into the most perfect food in the world.
Doctor McCollom, of Johns Hopkins University, tells us that the "water soluble A" and the "fat soluble B," two mysterious somethings, are found in milk as nowhere else. Without these mysterious vitamins children will not grow, so milk-fed babies have the greatest possible advantage over the wolf-reared children raised without milk to drink.
How are the slim babies fed? Black coffee, pickles, imitation jams and molasses are their bread, constitute the daily rations of thousands of our poor families in the cities.
Without milk children languish, the vigor of the adult declines and the vitality of the human race runs low.

Early After-Harvest Cultivation.
"A stitch in time saves nine." In the case of weeds prompt and thorough after-harvest cultivation prevents many thousands of weeds from developing seeds, and thus saves hours of tedious labor the succeeding season. Early after-harvest cultivation is one of the best ways to destroy annual and winter annual weeds, such as False Flax, Corn Cockle, Wild Buckwheat, Pigweed, Ball Mustard, Wormseed Mustard and Annual Sow Thistle. Plough shallow, not more than three or four inches deep, immediately after harvest, and harrow and cultivate frequently. By the shallow ploughing the weed seeds are kept near the surface and by the frequent stirring of the soil they are made to sprout, and having sprouted they are easily destroyed by further cultivation.—Dr. C. A. Zavitz, O. A. College, Guelph.

One and a half oz. of formalin in 15 1/2 oz. of water fed at the rate of one teaspoonful per pint of milk is a good remedy in the case of diarrhoea in calves.
Everyone reads the "Guide-Advocate Want Column" on page 4.

Rub it in for Lame Back.—A and bring speedy relief. Try it and brisk rubbing with Dr. Thomas' be convinced. As the liniment sinks Electric Oil will relieve lame back, in the pain comes out and there are The skin will immediately absorb the ample grounds for saying that it is oil and it will penetrate the tissues an excellent article.

THE FORD POWER PLANT
THE first model T Ford engine was made in 1908. It was the perfected development of Henry Ford's motor inventions dating back sixteen years to 1892 when he built his first little one-cylinder motor.
During that sixteen years Ford Cars were made in many models from little two-cylinder "chuggers" to big six-cylinder, high-priced cars.
But in 1908 the crystallized results of all those years of experience and study was the model T, the Ford power plant of today.
And since 1908, thirteen years of test under every condition of use in peace and war, in every nook and corner of the globe has shown not a single weakness nor a need of improvement, nor of additions to the power plant which drives half of all cars on earth.
The wonderful durability and power of the Ford engine, its simplicity of operation and its economy in fuel and repairs, are reasons why the Ford car should be a good car for you to own.
